Approved by Paul E. Blair

Applicant: Harris CapRock Communications, Inc.
Call Sign: E060157
File No.: SES-STA-20121002-00896
Special Temporary Authority (STA)

Harris CapRock Communications, Inc. is granted an extension of the current SES-STA-20120830-00793 for a 30-day period from October 6, 2012 through November 5, 2012 to operate this ESV station to communicate with satellite Galaxy 25@ 93.1 W.L. with the following conditions:

1) The antenna models Intellian V60 and V80 will operate with off-axis EIRP densities that will continue to comply with 47 C.F.R § 25.222.

2) All operations shall be on an unprotected and non-harmful interference basis, Harris CapRock Communications, Inc., E060157, shall not cause harmful interference to, and shall not claim protection from, interference caused to it by any other lawfully operating station and it shall cease transmission(s) immediately upon notice of such interference.

The image shows a red ink stamp from the Federal Communications Commission (FCC). The stamp is rectangular and contains several fields with handwritten information in blue ink. At the top, the file number "SES-STA-20121002-00896" is written. Below it, the call sign "E060157" is written. The "Grant Date" field contains "10-5-12". The "Term Dates" field contains "10-6-12" for the start date and "11-5-12" for the end date. The "Applicant" field contains a signature that appears to be "Paul E. Hayes". To the left of the stamp is a circular seal of the FCC, and below it, the text "COMMUNICATIONS FEDERAL RESERVE BOARD" is partially visible.

Re: Request for Special Temporary Authority – Harris CapRock
Communications, Inc.

Pursuant to Section 25.120(b) of the Rules and Regulations (“Regulations”) of the Federal Communications Commission (“Commission”), Harris CapRock Communications Inc. (“HARRIS CAPROCK”) seeks Commission consideration to renew a Special Temporary Authority (“STA”) to operate Earth Stations on Vessels (“ESVs”) while an application for permanent authority is being reviewed. On August 30, 2012, HARRIS CAPROCK filed an application to modify its existing ESV license to include the Intellian V60 and V80¹ antennas (File No. SES-MOD-20120509-00427, call sign E060157). On July 3, 2012, HARRIS CAPROCK filed an STA application and was granted for a 30 day period as file SES-STA-20120830-00793. The existing STA expires on October 6, 2012. CapRock is requesting a 60-day grant.

According to Section 25.120(b)(1) of the Regulations, “the Commission may grant a temporary authorization only upon a finding that there are extraordinary circumstances requiring temporary operations in the public interest and that delay in the institution of these temporary operations would seriously prejudice the public interest.”

HARRIS CAPROCK is a global provider of fully managed communications solutions for remote and harsh environments. The proposed application would authorize HARRIS CAPROCK to operate ESVs on vessels that routinely perform new construction and maintenance of subsea facilities in the Gulf of Mexico. The communication links at issue will carry video images of subsea structures as well as their construction and maintenance. The proper supervision of subsea operations is paramount to the prevention of construction disasters as well as the safety of personnel engaged in such endeavors. This is an extraordinary circumstance that requires temporary operations in the public interest. The delay in the institution of these temporary operations would seriously prejudice the public interest.

¹ Intellian V60 is a Ku-band 60cm diam. stabilized antenna. The Intellian V80 is a Ku-band 80cm diam. Stabilized antenna. Both operate with a radome.

The analysis in the principal application has shown that the Intellian V60 and Intellian V80 antennas conform to the spectral density envelopes outlined in Section 25.222 of the Regulations when limited to -22.30 dB/4KHz and -20.13 dB/4KHz respectively, at the feed. Harris CapRock will operate within these limits. Furthermore, Intellian has certified that the antennas comply with the 100ms automatic shut-off for an off-axis deviation of more than 0.5 degrees from the target satellite.² The analysis in the application has also shown that radiation levels at the proposed terminals will be within the exposure limits of 47 CFR §1.1310

Pursuant to Section 25.120(b)(3) of the Regulations, the Commission may grant temporary authorization for a period not to exceed 60 days, if the STA has not been placed on public notice, and the applicant plans to file a request for regular authority for the service. In the instance case, the Commission has not placed the STA application on public notice. Furthermore, HARRIS CAPROCK has filed an application for permanent authority. HARRIS CAPROCK is asking the Commission to grant it STA beginning October 6, 2012. The planned satellites are G25 (93W) and Telstar 14 (63W).

Sincerely,

/s/ Raul Magallanes

Raul Magallanes

Counsel to Harris CapRock Communications, Inc.
