EchoStar is authorized, for a period of 30 days, to perform telemetry, tracking, and control (TT &C) and feeder link communications for the EchoStar 8, (Mexican licensed) satellite at the 76.90° W.L. orbital location. Operations under this authorization are subject to the terms, conditions, and technical specifications set forth in EchoStar's pending application and the Federal Communications Commission's rules, and are subject to the conditions set forth below.

Conditions:

1. Operation under this grant of special temporary authority must be on an unprotected and non-harmful interference basis, *i.e.*, while operating under this temporary authority EchoStar must not cause harmful interference to, and must not claim protection from interference caused to it by, any other lawfully operating radiocommunication system. EchoStar must cease operations immediately upon notification of such interference and must immediately inform the Commission, in writing, of such an event.
2. Grant of this authorization is without prejudice to any determination that the Commission may make regarding related EchoStar pending applications.
3. Grant of this authorization is without prejudice to any enforcement action.
4. Any action taken or expense incurred as a result of operations pursuant to this STA is solely at EchoStar's risk.
5. This action is issued pursuant to Section 0.261 of the Commission's rules on delegated authority, 47 C.F.R. § 0.261, and is effective immediately. Petitions for reconsideration under Section 1.106 or applications for review under Sections 1.115 of the Commission's rules, 47 C.F.R. §§ 1.106, 1.115, may be filed within thirty days of the date of the public notice indicating that this action was taken.

FCC NOTICE REQUIRED BY THE PAPERWORK REDUCTION ACT

The public reporting for this collection of information is estimated to average 2 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the required data, and completing and reviewing the collection of information. If you have any comments on this burden estimate, or how we can improve the collection and reduce the burden it causes you, please write to the Federal Communications Commission, AMD-PERF, Paperwork Reduction Project (3060-0678), Washington, DC 20554. We will also accept your comments regarding the Paperwork Reduction Act aspects of this collection via the Internet if you send them to PRA@fcc.gov. PLEASE DO NOT SEND COMPLETED FORMS TO THIS ADDRESS.

Remember – You are not required to respond to a collection of information sponsored by the Federal government, and the government may not conduct or sponsor this collection, unless it displays a currently valid OMB control number or if we fail to provide you with this notice. This collection has been assigned an OMB control number of 3060-0678.

THE FOREGOING NOTICE IS REQUIRED BY THE PAPERWORK REDUCTION ACT OF 1995, PUBLIC LAW 104-13, OCTOBER 1, 1995, 44 U.S.C. SECTION 3507.

In the Matter of

ECHOSTAR BROADCASTING CORPORATION

Applications for Special Temporary Authority and Modification to Operate Four Transmit/Receive Earth Stations with EchoStar 8 at 76.90° W.L.

APPLICATIONS FOR MODIFICATION AND SPECIAL TEMPORARY AUTHORITY

By this Application, and pursuant to Sections 25.117 and 25.120(b)(4) of the Commission’s rules,¹ beginning on or about December 11, 2012, EchoStar Broadcasting Corporation (“EBC” and collectively with its affiliates, “EchoStar”) requests the following: (1) 30-day special temporary authority (“STA”) to operate three transmit/receive earth stations (Call Signs E080058, E980174, and E980180) to provide telemetry, tracking, and control (“TT&C”) and feeder link communications during the relocation of the EchoStar 8 satellite to, and operations at, a new location within the 77° W.L. orbital cluster, 76.90° W.L., and to communicate with the satellite once at its new location; (2) 30-day STA to operate one transmit/receive earth station (Call Sign E080120) to provide TT&C during the relocation of EchoStar 8 to, and operations at, 76.90° W.L.; (3) modification of its authority to operate three

¹ See 47 C.F.R. §§ 25.117, 25.120(b)(4).

transmit/receive earth stations (Call Signs E080058, E980174, and E980180) to provide TT&C and feeder link communications once EchoStar 8 has been relocated to 76.90° W.L.; and (4) modification of its authority to operate one transmit/receive earth station (Call Sign E080120) to provide TT&C communications once EchoStar 8 has been relocated to 76.90° W.L.

EchoStar plans to direct the move of the QuetzSat-1 satellite from the 61.5° W.L. orbital location to 77.05° W.L. beginning in December 2012. In anticipation of this move, EchoStar seeks to move EchoStar 6 from 76.95° W.L. to 76.80° W.L. and to move EchoStar 8 from 77.05° W.L. to 76.90° W.L.

I. BACKGROUND

The nominal 77° W.L. orbital location is allotted to Mexico under the Region 2 Broadcasting-Satellite Service plan set forth in Appendices 30 and 30A to the International Radio Regulations. In addition to the EchoStar 6 satellite, two other EchoStar Direct Broadcast Satellites (“DBS”) currently operate at the nominal 77° W.L. orbital location under Mexican authority issued to EBC’s partner, QuetzSat: EchoStar 1 and EchoStar 8. EchoStar 8 is used by EchoStar’s customers, DISH Network L.L.C. (“DISH”) and DISH Mexico, to provide DBS service in the United States and Mexico, and EchoStar 6 and EchoStar 1 provide backup to the United States and Mexico services, respectively. The U.S. service includes local-into-local programming in a number of markets in the southern United States. Currently, EchoStar 8 at 77° W.L., as backed up by EchoStar 1 and EchoStar 6, provides sufficient capacity to avoid service disruptions from that slot in the event any of the satellites experience a problem.

II. GRANT OF THIS APPLICATION IS IN THE PUBLIC INTEREST

These applications are in the public interest because they will ensure the continued safe operation of EchoStar 8 at the nominal 77° W.L. orbital location as the satellite is moved to

accommodate the pending arrival of QuetzSat-1. During relocation to and operations at 76.90° W.L., EchoStar will ensure that operations do not cause harmful interference to any other satellite.

III. OPERATIONAL PARAMETERS

During relocation maneuvers and maintenance of EchoStar 8 at the 76.90° W.L. orbital location, the earth station and satellite will operate subject to the following conditions:

1. All drift orbit TT&C and feeder link operations will be coordinated with other potentially affected in-orbit operators.
2. Drift operations and operations at 76.90° W.L. shall be on a non-harmful interference basis, meaning that EchoStar 8 shall not cause interference to, and shall not claim protections from, interference caused to it by any other lawfully operating satellites.
3. In the event that any harmful interference is caused as a result of TT&C or feeder link operations during the relocation of the EchoStar 8 satellite or while the satellite is at 76.90° W.L., EchoStar 8 shall cease the offending operations immediately upon notification of such interference and the Commission will be informed immediately, in writing, of such event.

IV. WAIVER PURSUANT TO SECTION 304 OF THE ACT

In accordance with Section 304 of the Communications Act of 1934, as amended, 47 U.S.C. § 304, EBC hereby waives any claim to the use of any particular frequency or of the electromagnetic spectrum as against the regulatory power of the United States because of the previous use of the same, whether by license or otherwise.

V. CONCLUSION

For the foregoing reasons, EBC respectfully requests the grant of its application for special temporary authority, beginning on or about December 11, 2012, to operate three transmit/receive earth stations (Call Signs E080058, E980174, and E980180) to provide TT&C and feeder link service during the relocation to, and operations of, EchoStar 8 at 76.90° W.L. and to operate one transmit/receive earth station (Call Sign E080120) to provide TT&C service for

the relocation to, and operations of, EchoStar 8 at 76.90° W.L. EBC also respectfully requests the grant of its application for modification of its authority to operate the three transmit/receive earth stations (Call Signs E080058, E980174, and E980180) to provide TT&C and feeder link service for EchoStar 8 at 76.90° W.L. and to operate one transmit/receive earth station (Call Sign E080120) to provide TT&C service for EchoStar 8 at 76.90° W.L.

Respectfully submitted,

Pantelis Michalopoulos
