**APPLICATIONS FOR RENEWAL OF SPECIAL TEMPORARY AUTHORITY**

By this Application, and pursuant to Section 25.120(b)(4) of the Commission’s rules,<sup>1</sup> EchoStar Broadcasting Corporation (“EBC” and collectively with its affiliates, “EchoStar”) requests renewal of a 30-day special temporary authority (“STA”) to operate three transmit/receive earth stations (Call Signs E080120, E020306, and E070273) to provide telemetry, tracking, and control (“TT&C”) to the EchoStar 6 satellite at 76.80° W.L. The current STAs expire on January 26, 2013.<sup>2</sup>

**I. BACKGROUND**

The nominal 77° W.L. orbital location is allotted to Mexico under the Region 2 Broadcasting-Satellite Service plan set forth in Appendices 30 and 30A to the International Radio Regulations. EchoStar currently operates four Direct Broadcast Satellites (“DBS”) at the

nominal 77° W.L. orbital location under Mexican authority issued to EBC's partner, QuetzSat, S. de R.L. de C.V. ("QuetzSat"): EchoStar 1 (77.15° W.L.), EchoStar 6 (76.80° W.L.), EchoStar 8 (76.90° W.L.), and QuetzSat-1 (77.05° W.L.). EchoStar 8 is used by EchoStar's customers, DISH Network L.L.C. ("DISH") and DISH Mexico, to provide DBS service in the United States and Mexico, and EchoStar 6 and EchoStar 1 provide backup to the United States and Mexico services, respectively. QuetzSat-1 is currently undergoing in-orbit testing.<sup>3</sup> The U.S. service includes local-into-local programming in a number of markets in the southern United States. EchoStar 6, operating with EchoStar 1 and EchoStar 8 at the nominal 77° W.L. orbital location, provides sufficient capacity to avoid service disruptions from that slot in the event any of the satellites experience a problem.

EchoStar relocated EchoStar 6 to the nominal 77° W.L. orbital location in February 2011<sup>4</sup>—a move prompted by a single event upset that temporarily affected the EchoStar 8 satellite.<sup>5</sup> On March 14, 2011, EchoStar filed an application to transfer EchoStar 6 to QuetzSat, intending to operate the satellite under Mexican authority from the nominal 77° W.L. orbital location.<sup>6</sup> EchoStar also filed an application ("Blanket Earth Station Application") to modify its

blanket earth station authorization to receive service from the Mexican-licensed EchoStar 6 satellite.<sup>7</sup>

After consulting with the Commission, EchoStar concluded that the reflagging was no longer necessary and withdrew its reflagging application.<sup>8</sup> Instead, EchoStar 6 currently operates at 76.80° W.L. pursuant to a 180-day STA.<sup>9</sup> The Mexican concessionaire for the 77° W.L. orbital location has informed COFETEL of this plan, and EchoStar understands that COFETEL has no objection to the continued operations of the EchoStar 6 satellite in the 77° W.L. cluster under Commission authority.

## II. GRANT OF THIS APPLICATION IS IN THE PUBLIC INTEREST

These applications are in the public interest for the reasons set forth in the Satellite STA Application<sup>10</sup> and the Blanket Earth Station Application, which are incorporated herein by reference. Furthermore, grant of these applications will ensure the continued safe operation of EchoStar 6 at the nominal 77° W.L. orbital location.

### III. WAIVER PURSUANT TO SECTION 304 OF THE ACT

In accordance with Section 304 of the Communications Act of 1934, as amended, 47 U.S.C. § 304, EBC hereby waives any claim to the use of any particular frequency or of the electromagnetic spectrum as against the regulatory power of the United States because of the previous use of the same, whether by license or otherwise.

### IV. CONCLUSION

For the foregoing reasons, EBC respectfully requests the grant of its application for special temporary authority to operate three transmit/receive earth stations (Call Signs E080120, E020306, and E070273) to provide TT&C service for EchoStar 6 at 76.80° W.L.
