Request for Extension of Special Temporary Authority

TELEVISA, SA de CV is granted STA, under special operation conditions, for a period of 60 days.

1. Operation will Transmit/Receive in the 5925-6425 MHz frequencies as uplink and 3700-4200 MHz frequencies as downlink with ALSAT-designated authority using the Vertex 2.4 m antenna model SM-LT at antenna gain of 42.0 dBi at 6.175 MHz and 38.1 dBi at 3.95 MHz.

5. Any action taken or expense incurred as a result of operations pursuant to this STA is solely at TELEVISA, SA de CV's risk.

Because the underlying FCC Form 312 for Televisa Mob-1 has not yet been acted upon by the FCC, and the current STA expires this coming Saturday, September 14, Televisa hereby requests an extension of the current STA for an additional period of 60 days in order to undertake broadcasts in numerous cities during upcoming events.

During the extension period, Televisa will operate Mob-1 in accordance with the conditions specified above and, in each case, no broadcast will take place until frequency coordination at the particular location for the selected date has been undertaken and confirmed.

The purpose of this request is to allow Televisa, a network organization operating in Mexico, to carry the live telecasts of sporting events of significant interest to its viewers -- each of which events are scheduled outside the control of Televisa.

Because of the imminent nature of the prospective telecasts, urgent action on this request for STA is respectfully requested.

If there are any questions with respect to this request, please contact the undersigned counsel for Televisa, S.A. de C.V.
