12. Description

EXPEDITED ACTION REQUESTED -- SES requests a 30-day STA to conduct antenna testing (starting July 7, 2014) on a new 7.6m conventional C-band antenna at its Woodbine teleport, prior to grant of the modification application to add that antenna to the existing E120055 earth station license (see File No. SES-MOD-INTR2014-01195, filed June 16, 2014). Technical parameters of THE proposed operations are contained in the Schedule B of the modification application and are incorporated by reference. Terrestrial coordination for the new antenna has been completed -- see modification application. Other antennas at the same site (including E120055) have been authorized to operate in the conventional C-band frequencies.
