Re: Supplement to HNS License Sub, LLC Application for Special Temporary
Authority – SES-STA-20150814-00524

Dear Ms. Dortch:

On August 14, 2015, HNS License Sub, LLC (Hughes) filed an application for special temporary authority for 60 days to operate up to 100,000 remote earth terminals (74 cm in diameter) in the Ka-band fixed satellite service, including a partial waiver of Section 25.209(b)'s cross-polarization requirements.¹ To supplement the application, Hughes clarifies that it will file an application for regular authority for these antennas by modifying call sign E060445.

Please do not hesitate to contact me with any questions.

Sincerely,

/s/ Jesse Jachman
