

**Harris Corporation  
Request for Special Temporary Authority  
2.4m C Band Temporary Transportable Earth Station  
File No. SES-STA-20151119-00854**

**Supplemental Exhibit**

Harris Corporation ("Harris") hereby submits this supplemental exhibit to its request for Special Temporary Authority filed on November 19, 2015 under FCC File No. SES-STA-20151119-00854. The purpose of this supplement is to correct the previous exhibit by noting that Harris will deploy a 2.4m Prodelin 2244 antenna for the proposed C-Band testing at the Prospect, Connecticut location.

In the original exhibit it was incorrectly noted that Harris would utilize a 2.4m Flyaway C-Band antenna.

The 2.4m Prodelin 2244 antenna would communicate with the AMC-8 Satellite.

Harris submits that a grant of this application will serve the public interest because it will assist the FAA's mission of ensuring flight safety and will further the ASTI and NAS modernization programs.
