**Subject:** ExxonMobil Call Sign E000001

Paul,  
I hope you are enjoying the long weekend, although I suspect you may be shoveling snow today like me!  
I understand that you have the clarifying information (limiting the scope of the request to Galaxy 28 only) necessary to grant the STA request for ExxonMobil Call Sign E000001 and that, despite the press of other priorities for you and your team, a grant will be forthcoming shortly.

To the extent convenient and given the prior coordinated status of this site, we would greatly appreciate a written or verbal grant to communicate with Galaxy 28 to enable equipment installation and switchover this week before the current satellite capacity contract with Satmex 6 expires.

Thank you again for your ongoing attention to this matter.

Best regards,

Carlos
