

Attachment 1
Application for Earth Station STA

DataPath, Inc. (DataPath) filed a modification application (SES-MOD-20151103-00813) for its current Temporary-Fixed Satellite earth station license (E080209) in order to add four (4) new transportable (non-site specific) antennas (QCT90) for customer demonstration purposes. The application was dismissed without prejudice.

DataPath plans to refile the modification application and is requesting a 60-day STA in the interim in order to perform customer demonstrations.

The QCT90s will operate with Galaxy 18 @ 123 West.

The File Number for the most recent modification approved for this license is SES-MOD-20090317-00331.

The grant of this application will serve the public interest by allowing DataPath to demonstrate this innovative antenna that will facilitate remote communications for aerospace, broadcast, government, and infrastructure customers.
