Subject: **SES-STA-20160518-00444 (Call Sign E140054)**

Dear Mr. Blais,

On May 18, 2016, SES Americom, Inc. submitted the above-referenced application seeking Special Temporary Authority to provide service to the AMC-6 satellite from earth station E140054. We wish to update the record to clarify that the request is limited to the following frequencies with the following characteristics:

**Receive Frequency**

Frequency (MHz)	Polarization	Emission Designator	Maximum EIRP per Carrier (dBW)	Maximum EIRP Density per Carrier (dBW/4kHz)
11700-12200	Horizontal and Vertical	100KG7W	0.0	0.0
11700-12200	Horizontal and Vertical	30M0G7W	0.0	0.0

**Transmit Frequency**

Frequency (MHz)	Polarization	Emission Designator	Maximum EIRP per Carrier (dBW)	Maximum EIRP Density per Carrier (dBW/4kHz)
14000-14500	Horizontal and Vertical	100KG7W	63.48	49.5
14000-14500	Horizontal and Vertical	30M0G7W	88.25	49.5

SES Americom filed a related modification application<sup>1</sup> and will shortly file an amendment to that application reflecting the corrected EIRP and EIRP density characteristics described above.

Please contact me with any questions you may have.

Sincerely

/s/ Petra A. Vorwig
