Special Temporary Authority (STA)

Moody bible Institute of Chicago (Moody) is granted special temporary authority extension for a period of 60 days, commencing June10, 2016. All operations are subject to the grant conditions as stated below.

1. Operations under this grant of special temporary authority must be on an unprotected, non-harmful interference basis, *i.e.*, while operating under this temporary authority Moody must not cause harmful interference to, and must not claim protection from interference caused to it by, any other lawfully operating radiocommunication system. Moody must cease operations immediately upon notification of such interference and must immediately inform the Commission, in writing, of such an event.
2. Moody must take all necessary measures to ensure that the antenna does not create potential exposure of humans to radio frequency radiation in excess of the FCC exposure limits defined in 47 CFR § § 1.1307(b) and 1.1310 wherever such exposures might occur. Measures must be taken to ensure compliance with limits for both occupational controlled exposure and for general population/uncontrolled exposure, as defined in these rule sections. Requirements for restrictions can be determined by predictions based on calculations, modeling or by field measurements. The FCC's OET Bulletin 65 (available on-line at [www.fcc.gov/oet/rfsafety](http://www.fcc.gov/oet/rfsafety)) provides information on predicting exposure levels and on methods for ensuring compliance, including the use of warning and alerting signs and protective equipment for workers. The licensee shall ensure installation of by qualified installers who have an understanding of the antenna's radiation environment and the measures best suited to maximize protection of the general public and persons operating the equipment. A terminal exhibiting radiation exposure levels exceeding 1.0 m W/cm<sup>2</sup> in accessible areas, such as at the exterior surface of the radorne, shall have a label attached to the surface of the terminal warning about the radiation hazard and shall include thereon a diagram showing the regions around the tenriinal where the radiation levels could exceed 1.0 mW/cm<sup>2</sup>.
3. Moody must maintain a point of contact available 24 hours per day, seven days per week, with the authority and ability to terminate operations authorized, for discussing interference concerns with other licensees and U.S. Government agencies.
4. Antenna elevation for all operations must be at least 5 degrees above the geographical horizon.

5. Grant of this authorization is without prejudice to any determination that the Commission may make regarding pending applications or future requests for special temporary authority.
6. Any action taken or expense incurred as a result of operations pursuant to this special temporary authority is solely at Moody's risk.

This action is issued pursuant to Section 0.26 1 of the Commission's rules on delegated authority, 47 C.F.R. § 0.261, and is effective immediately. Petitions for reconsideration under Section 1.106 or applications for review under Sections 1.115 of the Commission's rules, 47 C.F.R. § § 1.106, 1.115, may be made within thirty days of the date of the public notice indicating that this action was taken.

Re: Request for a 90 day Special Temporary Authority (STA)

Dear Mr. Blais,

Pursuant to Section 25.120(a) of the Rules and Regulations ("Regulations") of the Federal Communications Commission, Moody Bible Institute of Chicago seeks consideration for a request for 90 day Special Temporary Authority ("STA") to operate a new C-band earth station in Anderson, IN.

Moody Bible Institute of Chicago is requesting a 90 day STA to start satellite operations while their permanent FSS C-band application (SES-AMD-20160517-00433 / E160046) is currently waiting to go on Public Notice with the Commission. Moody Bible Institute of Chicago does not have a terrestrial interconnection(s) to their regional non-commercial radio stations that serve the public interest, and therefore is requesting a 90 day STA to keep broadcast programming available and on the air.

Moody Bible Institute of Chicago accordingly urgently requests that a 90 day STA be granted so that the reliable broadcast service to the public in key regional areas can be satisfied and maintained forthwith.

Thank you for your attention and help in this matter.

Sincerely,

*Mark Williames*  
Director of Engineering
