Special Temporary Authority (STA)

The Christian Broadcasting Network, Inc, ("CBN"), is granted STA for a period of 60 days, commencing April 15, 2016, to operate its fixed earth stations in Virginia Beach, VA with the TELSTAR 12V (S2933) satellite operating at the 15.0 W.L. orbital location in the 13.8-14.0 GHz (Earth-to-space) frequency band under the following conditions:

1. Operations under this grant of special temporary authority must be on an unprotected, non-harmful interference basis, i.e., while operating under this temporary authority CBN must not cause harmful interference to, and must not claim protection from interference caused to it by, any other lawfully operating radiocommunication system. CBN must cease operations immediately upon notification of such interference and must immediately inform the Commission, in writing, of such an event.
2. All operations must be within the limits power requested in IBFS File Nos. SES-MOD-20151201-00882 as amended by SES-AMD-20160121-00092.
3. CBN. must take all necessary measures to ensure that the antenna does not create potential exposure of humans to radio frequency radiation in excess of the FCC exposure limits defined in 47 CFR §§ 1.1307(b) and 1.1310 wherever such exposures might occur. Measures must be taken to ensure compliance with limits for both occupational controlled exposure and for general population/uncontrolled exposure, as defined in these rule sections. Requirements for restrictions can be determined by predictions based on calculations, modeling or by field measurements. The FCC's OET Bulletin 65 (available on-line at www.fcc.gov/oet/rlfsafety) provides information on predicting exposure levels and on methods for ensuring compliance, including the use of warning and alerting signs and protective equipment for workers. The licensee shall ensure installation of by qualified installers who have an understanding of the antenna's radiation environment and the measures best suited to maximize protection of the general public and persons operating the equipment. A terminal exhibiting radiation exposure levels exceeding 1.0 m W/cm² in accessible areas, such as at the exterior surface of the radome, shall have a label attached to the surface of the terminal warning about the radiation hazard and shall include thereon a diagram showing the regions around the terminal where the radiation levels could exceed 1.0 mW/cm².
4. CBN must maintain a point of contact available 24 hours per day, seven days per week, with the authority and ability to terminate operations authorized, for discussing interference concerns with other licensees and U.S. Government agencies.
5. Grant of this authorization is without prejudice to any determination that the Commission may make regarding pending applications or future requests for special temporary authority.

FCC NOTICE REQUIRED BY THE PAPERWORK REDUCTION ACT

The public reporting for this collection of information is estimated to average 2 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the required data, and completing and reviewing the collection of information. If you have any comments on this burden estimate, or how we can improve the collection and reduce the burden it causes you, please write to the Federal Communications Commission, AMD-PERF, Paperwork Reduction Project (3060-0678), Washington, DC 20554. We will also accept your comments regarding the Paperwork Reduction Act aspects of this collection via the Internet if you send them to PRA@fcc.gov. PLEASE DO NOT SEND COMPLETED FORMS TO THIS ADDRESS.

Remember – You are not required to respond to a collection of information sponsored by the Federal government, and the government may not conduct or sponsor this collection, unless it displays a currently valid OMB control number or if we fail to provide you with this notice. This collection has been assigned an OMB control number of 3060-0678.

THE FOREGOING NOTICE IS REQUIRED BY THE PAPERWORK REDUCTION ACT OF 1995, PUBLIC LAW 104-13, OCTOBER 1, 1995, 44 U.S.C. SECTION 3507.

12. Description

The applicant seeks an extension of its current special temporary authority ('STA') to continue using the Telstar 12 V, with conditions, as a new point of communication. The current STA was granted on January 29, 2016 and slated to expire on April 2, 2016. See FCC File No. SES-STA-20160226-00180. During the interim STA operations, there have not been any interference complaints.

As the Commission is aware, the applicant has a pending modification, filed on FCC Form 312, seeking permanent authority to add Telstar 12 V, and all associated aspects of that operation, to the E970050 authorization. See FCC File No. SES-MOD-20151201-00882. The ALLSAT satellite Telstar 12, predecessor to Telstar 12 V, is slated to be decommissioned on Sunday, January 31, 2016. In December 2015, and at the time the applicant submitted its original E970050 modification application, the Telstar 12 decommissioning was slated for the first few weeks of February. However, the Telstar 12 operator very recently accelerated the decommissioning timeline to cease operations on Sunday, January 31, 2016. As such, the applicant has no other option but seek an STA in order to continue service to its viewing community. Accordingly, the applicant respectfully requests an STA to commence temporary operations to include communications with Telstar 12 V as soon as possible.
