

### Request for STA

Pursuant to Section 25.120 of the FCC's Rules, the applicant requests Special Temporary Authority ("STA") to operate a temporary fixed satellite at various locations throughout the United States and its territories in the manner described in the attached license application.

The applicant filed a license application for a transmit/receive Ku-Band satellite earth station on July 13, 2016 in submission ID IB2016001607. The application is currently pending. The applicant now requests STA to operate the earth station beginning on **July 14, 2016**, according to the technical parameters proposed by the pending application, and until the permanent license application is granted. The earth station will be used in connection with the broadcast operations of WDRB(TV), Louisville, Kentucky. The public interest would be well served by grant of STA to allow for use of the new station until the permanent authorization is issued.
