Re: Request for Further Extension of Special Temporary Authority
Hagerstown, Maryland Earth Station E140121

Dear Ms. Dortch:

Intelsat License LLC (“Intelsat”) herein requests an additional 60 days, beginning August 5, 2016, of the Special Temporary Authority (“STA”)¹ previously granted Intelsat to use its Hagerstown, Maryland Ku-band earth station—call sign E140121—to continue providing telemetry, tracking, and command (“TT&C”) services to Intelsat 31 at 95.05° W.L.² The IOT and drift of Intelsat 31 are complete and the satellite arrived on-station at 95.05° W.L. on July 26, 2016.³

The proposed operations will continue to be performed using the following frequencies: 13998.50 MHz and 14006.00 MHz in the uplink (LHCP, H); and 11194.25 MHz, 11195.50 MHz, 11196.25 MHz, and 11196.75 MHz in the downlink (RHCP, V). The proposed TT&C operations at 95.05° W.L. will be consistent with Intelsat’s coordination agreements for the nominal 95° W.L. location. All operators of potentially affected satellites will be provided with an emergency phone number where the licensee can be reached in the event that harmful interference occurs.

In further support of this further extension request, Intelsat incorporates by reference Exhibit A of its initial STA request, which contains technical information that demonstrates that the operation of the earth station will be compatible with its electromagnetic environment and will not cause harmful interference into any lawfully operating terrestrial facility, or into Federal systems operating in the 13.75

¹ Intelsat has filed its STA request, an FCC Form 159, a \$195.00 filing fee, and this supporting letter electronically via the International Bureau’s Filing System (“IBFS”).

² Intelsat’s previous STA requests also included TT&C during in-orbit testing (“IOT”) at 132.0° W.L and the drift to 95.05° W.L., which are now complete. See *Satellite Communications Services Information; Actions Taken*, Report No. SES-01864, File No. SES-STA-20160622-00568 (June 29, 2016) (Public Notice); *Satellite Communications Services Information; Actions Taken*, Report No. SES-015751858, File No. SES-STA-20160503-00391 (June 8, 2016) (Public Notice). Intelsat is seeking to modify the E140121 license to include TT&C communications with Intelsat 31. See *Application of Intelsat License LLC to Modify License*, File No. SES-MFS-20160620-00555 (filed June 20, 2016).

³ See Letter from Susan H. Crandall, Counsel for Intelsat Corporation, to Ms. Marlene H. Dortch, FCC, File No. SAT-LOA-20140410-00038 (July 26, 2016).

-14.00 GHz band. In the extremely unlikely event that harmful interference should occur due to transmissions to or from its earth station, Intelsat will take all reasonable steps to eliminate the interference.

Grant of this STA further extension request will allow Intelsat to continue to safely station-keep the Intelsat 31 satellite. This, in turn, will provide additional capacity to customers at the 95.05° W.L. orbital location and thereby promotes the public interest.

Please direct any questions regarding this STA request to the undersigned at (703) 559-6949.

Respectfully submitted,

A handwritten signature in blue ink that reads "Cynthia J. Grady". The signature is fluid and cursive, with a long horizontal flourish extending to the right.
