

**Attachment 1**  
**Application for Earth Station STA**

DataPath, Inc. (DataPath) filed a modification application (SES-MOD-20160615-00518) for its current Temporary-Fixed Satellite earth station license (E080209) in order to add four (4) new transportable (non-site specific) antennas (QCT90) for customer demonstration purposes. The application was accepted for Public Notice on July 6, 2016.

DataPath is requesting a 30-day STA in the interim in order to perform customer demonstrations including on August 9.

The QCT90s will operate with Galaxy 17 @ 91West.

The grant of this application will serve the public interest by allowing DataPath to demonstrate this innovative, transportable antenna that will facilitate remote communications for aerospace, broadcast, government, and infrastructure customers.
