

**EXHIBIT 1**  
**REQUEST FOR SPECIAL TEMPORARY AUTHORITY**

AT&T Corp. (“AT&T”) respectfully requests a grant of special temporary authority (“STA”)<sup>1</sup> for 60 days commencing March 1, 2017 to operate a 13.1 meter Ku-band antenna at its Catawissa, Pennsylvania earth station (Call Sign E110107) prior to grant of its pending modification application.<sup>2</sup> AT&T filed a modification application on February 14, 2017 to convert the earth station’s 13.1 meter C-band transmit/receive antenna to a 13.1 meter Ku-band transmit/receive antenna.<sup>3</sup> The pending modification application contains complete technical details of the Ku-band antenna’s proposed operations, which are incorporated by reference here.

Grant of special temporary authority will serve the public interest by allowing AT&T to meet an immediate customer demand. AT&T’s customer, a U.S. Government agency, intends to use the antenna for national security-related purposes. This customer has expressed a desire to begin using the antenna as soon as March 1, 2017. Accordingly, AT&T respectfully submits this STA request to authorize use of the 13.1 meter Ku-band antenna prior to grant of AT&T’s pending modification application.

AT&T understands that all operations pursuant to a grant of special temporary authority will be on a non-interference basis. AT&T does not anticipate that its operations of this Ku-band antenna will cause any harmful interference or adversely affect any other authorized users. AT&T further understands that any grant of STA request would be without prejudice to action on the underlying pending modification application.

---

<sup>1</sup> AT&T has filed this STA request, an FCC Form 159, and a \$200.00 filing fee electronically via the International Bureau’s Filing System.
