 Approved: [Signature]

Applicant: Row 44 Inc.
File Number: SES-STA-20170403-00358
Call Sign: E080100
Special Temporary Authority

Row 44, Inc., is granted an extension of Special Temporary Authority for 60 days to operate earth station aboard aircraft (ESAA) terminals with the AMC-6 satellite at 67° W. L orbital location in the 14.05-14.47 GHz (Earth-to-space) and 11.7-12.2 GHz (space-to-Earth) frequency bands under the following conditions:

1. Operations under this authority are on a non-interference basis only.
2. Operations under this authority are on a non-protected basis only.
3. In the event that there is a report of interference, Row 44 Inc.'s must immediately terminate transmissions and notify the FCC in writing.
4. The operations will be coordinated with all operators of satellites that use the same frequency bands and are in the relocation path. All operators of satellites in that path will be provided with an emergency phone number where the licensee can be reached in the event that harmful interference occurs.
5. Any action taken or expense incurred as a result of operations pursuant to this special temporary authority is solely at Row 44 Inc.'s risk.
6. Grant of this authorization is without prejudice to any determination that the Commission may make regarding pending application, IBFS File No. SES-MFS-20170221-00188.

This action is issued pursuant to Section 0.261 of the Commission's rules on delegated authority, 47 C.P.R. § 0.261, and is effective immediately.

FCC NOTICE REQUIRED BY THE PAPERWORK REDUCTION ACT

The public reporting for this collection of information is estimated to average 2 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the required data, and completing and reviewing the collection of information. If you have any comments on this burden estimate, or how we can improve the collection and reduce the burden it causes you, please write to the Federal Communications Commission, AMD-PERM, Paperwork Reduction Project (3060-0678), Washington, DC 20554. We will also accept your comments regarding the Paperwork Reduction Act aspects of this collection via the Internet if you send them to PRA@fcc.gov. PLEASE DO NOT SEND COMPLETED FORMS TO THIS ADDRESS.

Remember – You are not required to respond to a collection of information sponsored by the Federal government, and the government may not conduct or sponsor this collection, unless it displays a currently valid OMB control number or if we fail to provide you with this notice. This collection has been assigned an OMB control number of 3060-0678.

THE FOREGOING NOTICE IS REQUIRED BY THE PAPERWORK REDUCTION ACT OF 1995, PUBLIC LAW 104-13, OCTOBER 1, 1995, 44 U.S.C. SECTION 3507.

EXPLANATORY STATEMENT

Row 44, Inc., pursuant to Section 25.120(b) of the FCC's Rules, hereby seeks Special Temporary Authority ("STA") for an additional thirty (30) days, until May 9, 2017, to operate its licensed Ku-band network of Earth Stations Aboard Aircraft ("ESAA") (Call Sign E080100) using space segment capacity on the SES, S.A. ("SES") AMC-6 satellite ("AMC-6") at 67° W.L. The capacity on AMC-6 has been used pursuant to a series of STAs that commenced in December 2016 (*see* FCC File Nos. SES-STA-20161207-00932, SES-STA-20161223-00971, SES-STA-20170130-00104 and SES-STA-20170223-00193) as interim replacement capacity for AMC-3, which is currently included in the Row 44 license and has been relocated to 72° W.L. Initially, Row 44 expected to operate the AMC-6 capacity at 67° W.L. only until January 2017. However, Row 44 now expects to use capacity at both 72° W.L. and 67° W.L. for the foreseeable future, and is expecting to transition its operations at 67° W.L. to the new SES-10 satellite, when it arrives on station in the coming weeks. Row 44 anticipates amending its currently pending license modification application (FCC File No. SES-MFS-20170221-00188, originally filed as SES-MFS-20170126-00061) in the very near term to add SES-10 at 67° W.L. as an additional point of communication.

Row 44's current operations on AMC-6 at 67° W.L. are subject to the existing coordination certification letter from SES with respect to AMC-3 under Section 25.227(b)(2) of the Commission's Rules and to all other conditions of its existing license. In providing its fleet management notification under Section 25.118(e) of the Commission's Rules, SES expressly stated that "it will operate within the technical parameters currently licensed and coordinated for AMC-3 ... at that location." FCC Public Notice, "Policy Branch Information: Satellite Space Station Applications Accepted for Filing," Report No. SAT-01194 (released October 21, 2016). Accordingly, there has been no change in Row 44's operations at this orbital location and the coordination certification provided for this slot remains valid.

Under Section 25.120(b)(1) of the FCC's Rules, the International Bureau may grant an STA when the public interest supports the relief requested, and/or delay in the institution of temporary operations would be contrary to the public interest. *See* 47 C.F.R. § 25.120(b)(1). Such authority may be granted for a period not to exceed 30 days "if the STA request has not been placed on public notice, and an application for regular authority is not contemplated." *See* 47 C.F.R. § 25.120(b)(4). Because Row 44 will not be filing an application for permanent access to AMC-6 at 67° W.L., its request is limited to thirty (30) days duration.

Grant of the additional authority requested here will promote the public interest by permitting Row 44 to continue providing service to its customers using capacity on the AMC-6 satellite temporarily in lieu of its prior capacity on AMC-3 and until SES-10 commences operation at the same orbital location. Use of AMC-6 will help maintain effective coverage of all U.S. domestic routes currently served by Row 44. Grant of the requested STA is consistent with Commission policy and will not adversely affect other authorized operations. Row 44 acknowledges that any action taken pursuant to a grant of the requested STA will be at its own risk, and respectfully requests that the FCC grant it authority not later than April 7, 2017, the Friday prior to the expiration date of its current STA, for an additional period of thirty (30) days to use the AMC-6 satellite as a point of communication in the conventional Ku-band in the United States using TECOM antennas now operating under its FCC ESAA network license.
