Applicant: Anadarko Petroleum Corporation  
Call Sign: E030216  
File No.: SES-STA-20170512-00556  
Special Temporary Authority (STA)

File # SES-STA-20170512-00556  
Call Sign E030216 Grant Date 05/18/2017  
(or other identifier)  
Term Dates  
From 05/18/2017 To 07/17/2017  
Approved: Paul E. [Signature]

Anadarko Petroleum Corporation is granted extension of special temporary authority, for 60 days, beginning May 18, 2017, to operate its fixed earth station on the Marco Polo Oil Platform in the Gulf of Mexico with currently authorized satellite points of communication using emission designator 9M38G7W in the 5425-6425 MHz (Earth-to-space) and 3700-4200 MHz (space-to-Earth) frequency bands under the following conditions:

1. Operations in 5925-6425 MHz frequency band shall not exceed the EIRP density limits specified in the current earth station authorization.
2. Operations, shall not cause harmful interference to, and shall not claim protection from, interference caused to it by any other lawfully operating station and it shall cease transmission(s) immediately upon notice of such interference.
3. Grant of this STA is without prejudice to any determination that the Commission may make regarding any Anadarko Petroleum Corporation's future applications.
4. Any action taken or expense incurred as a result of operations pursuant to this STA is solely at Anadarko Petroleum Corporation's risk.
5. The licensee shall take all necessary measures to ensure that the antenna does not create potential exposure of humans to radiofrequency radiation in excess of the FCC exposure limits defined in 47 CFR 1.1307(b) and 1.1310 wherever such exposures might occur. Measures must be taken to ensure compliance with limits for both occupational/controlled exposure and for general population/uncontrolled exposure, as defined in these rule sections. Compliance can be accomplished in most cases by appropriate restrictions, such as fencing. Requirements for restrictions can be determined by predictions based on calculations, modeling, or by field measurements. The FCC's OET Bulletin 65 (available on-line at [www.fcc.gov/oet/rfsafety](http://www.fcc.gov/oet/rfsafety)) provides information on predicting exposure levels and on methods for ensuring compliance, including the use of warning and alerting signs and protective equipment for workers.
6. Operations during the period May 15, 2017 to the grant of this authorization were authorized pursuant to Section 1.62 of the Commission's rules, 47 C.F.R. §1.62.

This action is issued pursuant to Section 0.261 of the Commission's rules on delegated authority, 47 C.F.R. §0.261, and is effective immediately.

## **REQUEST FOR SPECIAL TEMPORARY AUTHORITY**

Anadarko Petroleum Corporation (“Anadarko”), pursuant to Section 1.931 of the Rules and Regulations of the Federal Communications Commission (“FCC” or “Commission”), respectfully requests an extension of its Special Temporary Authority (“STA”) effective as soon as possible for a period of 60 days, or until the Commission has granted Anadarko’s regular authority for modifications to its Earth Station licenses identified by Call Signs E140005 (Lucius Spar), E030216 (Marco Polo), and E150008 (Heidelberg), (the “Earth Stations”) as discussed below.

### **Background**

Anadarko is among the largest independent oil and natural gas exploration and production companies in the world, with approximately 2.06 billion barrels of oil equivalent of proved reserves at year-end 2015. Anadarko’s operations are weighted towards resource plays in Texas and the southern US, the Rocky Mountain region in Colorado, Wyoming, and Utah, as well as the Appalachian region and Marcellus Shale in Pennsylvania and the Gulf of Mexico. Anadarko’s Earth Stations provide voice and data services to personnel on its Lucius Spar, Marco Polo, Heidelberg, and Independence Hub oil platforms in the Gulf of Mexico.

On March 16, 2017, the FCC granted Anadarko STA for a period of 60 days to operate its Earth Stations with the added Emission Designator 9M38G7W.<sup>1</sup> Anadarko completed frequency coordination for its regular authority modifications for the Earth Stations and submitted regular authority modifications to the Commission. The regular authority modification applications appeared on Public Notice on May 3 and May 10, 2017.<sup>2</sup>

### **Special Temporary Authority**

The Commission may grant STA “in emergency situations,” “to permit restoration or relocation of existing facilities to continue communications service,” and “in other situations involving circumstances which are of such extraordinary nature that delay in the institution of temporary operation would seriously prejudice the public interest.”<sup>3</sup> Anadarko’s C-band Earth Stations provide critical broadband connectivity for voice and data transmissions to and from its oil platforms. The bandwidth currently authorized under its Earth Station licenses is not sufficient to support Anadarko’s communications requirements.

seeks an extension of its STA’s to permit continued operation of its Earth Stations with the added Emission Designator 9M38G7W. Micronet Communications, Inc. has completed frequency coordination and has certified that all sites pass with the requested bandwidth and Micronet has certified that the Maximum EIRP Density will not increase beyond what is currently authorized under the existing licenses. Moreover, Anadarko submitted regularl

Anadarko Petroleum Corporation  
Fixed Satellite Service, Earth Stations

authority modification applications to add the new Emission Designator and make other technical changes which are now pending with the FCC.

Without increased bandwidth, Anadarko's satellite communications capabilities will be limited during the pendency of its modification applications, which will limit critical communications supporting Anadarko's oil production in the Gulf of Mexico. Reliable broadband connectivity is critical to operational integrity and the safety of personnel and the environment. Anadarko's C-Band transmissions are the most important component of its communications for its production platforms.

In light of the foregoing, Anadarko submits that grant of the requested STA extensions will serve the public interest, convenience, and necessity and favorable Commission action is warranted.
