12. Description

This application requests prior use special temporary authority to operate E030115 with Ku-Band frequencies on IS19. Applicant's customer needs to move from its current location at a California teleport to Hawaii because the look angle is too low from California and is causing scintillation issues for service to airplanes, its customers. To eliminate the airplane scintillation issues as quickly as possible, we request expedited processing for this request. An application to modify E030115 is also being filed simultaneously.
