Intelsat License LLC is granted a STA extension from SES-STA-20170927-01080 for 30 days, beginning November 4, 2017, to operate its 12.5 meter fixed earth station antenna in Castle Rock, Colorado to provide launch and early orbit phase (LEOP) services for the SES-15 satellite (licensed by Luxemburg) on the following center frequencies: 13999.0 MHz, 14001.0 MHz, 14499.0 MHz, and 14501.0 MHz (Earth-to-space), and 10700.5 MHz and 12199.5 MHz (space-to-Earth), under the following conditions:

1. Uplink (Earth-to-space) frequencies will be on 13999 MHz, 14001 MHz, 14499 MHz and 14501 MHz (V, H or LHCP) within the coordinated emission and power limits. The maximum EIRP shall not exceed 85 dBW per NTIA manual US 356.
2. Downlink (space-to-Earth) frequencies will be on 10700.50 MHz and 12199.50 MHz (V, H or LHCP).
3. The LEOP operations must be coordinated with all operators of satellites that use the same frequency bands and are in the LEOP path. All operators of satellites in that path will be provided with an emergency phone number where the licensee can be reached in the event that harmful interference occurs. Currently the 24x7 contact information for the SES-15 satellite LEOP mission is as follows: Ph.: (703) 559-7701 -East Coast Operations Center (primary); (310) 525-5591- West Coast Operations Center (back-up). Request to speak with Harry Burnham or Kevin Bell.
4. All operations shall be on an unprotected and non-harmful interference basis, Intelsat License LLC, KL92, shall not cause harmful interference to, and shall not claim protection from interference caused to it by any other lawfully operating station and it shall cease transmission(s) immediately upon notice of such interference.
5. In the event of any harmful interference under this grant of special temporary authority, Intelsat License LLC, KL92, must cease operations immediately upon notification of such interference, and must inform the Commission, in writing, immediately of such an event.
6. Grant of this authorization is without prejudice to any determination that the Commission may make regarding pending or future Intelsat License LLC applications.
7. This special temporary authority can only be used to provide launch and early orbit phase ("LEOP") services for the SES-15 satellite.
8. This action is issued pursuant to Section 0.261 of the Commission's rules on delegated authority, 47 C.F.R. §0.261, and is effective immediately.

INTELSAT.

Envision. Connect. Transform.

Re: Request for Further Extension of Special Temporary Authority
Castle Rock, Colorado Earth Station KL92

Dear Ms. Dortch:

Intelsat License LLC (“Intelsat”) herein requests an additional 30 days of Special Temporary Authority (“STA”)¹ previously granted Intelsat to use its Castle Rock, Colorado Ku-band earth station—call sign KL92—to provide launch and early orbit phase (“LEOP”) services for the SES-15 satellite.² SES-15 was launched on May 18, 2017.³ Intelsat expects the LEOP period to last approximately 200 days.⁴

The SES-15 LEOP operations will continue to be performed at the following frequencies: 13999.0 MHz, 14001.0 MHz, 14499.0 MHz, and 14501.0 MHz (V, H, or LHCP) in the uplink; and 10700.5 MHz and 12199.5 MHz (V, H, or LHCP) in the downlink. The LEOP operations will continue to be coordinated with all operators of satellites that use the same frequency bands and are in the LEOP path.⁵ All operators of satellites in that path will be provided with an emergency phone number where the licensee can be reached in the event that harmful interference occurs.

The 24x7 contact information for the SES-15 LEOP mission is as follows:

Ph.: (703) 559-7701 – East Coast Operations Center (primary)
(310) 525-5591 – West Coast Operations Center (back-up)

Request to speak with Harry Burnham or Kevin Bell.

¹ Intelsat has filed its STA request, an FCC Form 159, a \$200.00 filing fee, and this supporting letter electronically via the International Bureau’s Filing System (“IBFS”).

² See *Satellite Communications Services Information; Actions Taken*, Report No. SES-01999, File No. SES-STA-20170927-01080 (Oct. 11, 2017) (Public Notice); *Satellite Communications Services Information; Actions Taken*, Report No. SES-01946, File No. SES-STA-20170213-00157 (Apr. 12, 2017) (Public Notice).

³ The in-orbit testing location for SES-15, which Intelsat understands is licensed by Luxemburg, will be at 136° W.L. The final location of SES-15 will be at 129° W.L.

⁴ Intelsat is seeking authority for an additional 30 days to accommodate the longer orbit-raising time period required for an electric propulsion satellite.

⁵ Boeing, the manager of the SES-15 LEOP mission, will handle the coordination.

Ms. Marlene H. Dortch
October 30, 2017
Page 2

In further support of this extension request, Intelsat incorporates by reference Exhibits A and B, a 13 GHz report and a waiver request, submitted with its original STA request. In the extremely unlikely event that harmful interference should occur due to transmissions to or from its earth station, Intelsat will take all reasonable steps to eliminate the interference.

Finally, Intelsat clarifies that during the SES-15 LEOP mission, Boeing will continue to serve as the mission manager. Boeing will build and send the commands to the Intelsat antenna, which will process and execute the commands. Telemetry received by Intelsat will be forwarded to Boeing. Intelsat will continue to perform the ranging sessions by sending a tone to the spacecraft periodically. Intelsat will remain in control of the baseband unit, RF equipment, and antenna.

Grant of this STA further extension request will allow Intelsat to help launch the SES-15 satellite. This, in turn, will help provide additional capacity from the 129° W.L. orbital location and thereby promotes the public interest.

Please direct any questions regarding this STA further extension request to the undersigned at (703) 559-6949.

Respectfully submitted,

/s/ Cynthia J. Grady
