Application: Intelsat License LLC-

limits under the following conditions:

File No.: SES-STA-20180207-00098

Call Sign: E060384 Special Temporary Authority

Intelsat License LLC- requests special temporary authority for 180 days, beginning April 18, 2018, to operate its Riverside, California fixed earth station to provide launch and early orbit phase (LEOP) services for the SES-12 satellite on the following center frequencies: 13998.0 MHz, 13996.5 MHz, 13999.5 MHz, 14494.5 MHz, 14496.0 MHz, 14497.5 MHz, and 14499.0 MHz (Earth-to-space) and 11499.5 MHz and 11703.5 MHz (space-to-Earth) within coordinated emission, antenna size and power

- 1. All operators of satellites will be provided with an emergency phone number where the licensee can be reached in the event that harmful interference occurs, Currently the 24x7 contact information for the Intelsat 37e satellite is Ph.: (703) 559-7701 —East Coast Operations Center (primary) and (310) 525-5591 —West Coast Operations Center (back-up)
- 2. Operations, shall not cause harmful interference to or claim protection from other lawfully operating stations and it shall cease transmission(s) immediately upon notice of such interference.
- 3. Intelsat License LLC- coordinate with Navy Marine Corps Spectrum Center, Mr. Richard Ontiversos at <u>Richard.ontiversos1@navy.mil</u> or via phone, 301-225-3824 24 hours prior to schedule any operations.
- 4. In the event of any harmful interference under this grant of STA, Intelsat must cease operations immediately upon notification of such interference, and must inform the Commission, in writing, immediately of such an event.
- 5. Grant of this authorization is without prejudice to any determination that the Commission may make regarding pending or future Intelsat applications.
- 6. Any action taken or expense incurred as a result of operations pursuant to this STA is solely 'at Intelsat's risk.
- 7. This action is issued pursuant to Section 0.261 of the Commission's rules on delegated authority, 47 C.F.R. §0.261, and is effective immediately.

## FCC NOTICE REQUIRED BY THE PAPERWORK REDUCTION ACT

The public reporting for this collection of information is estimated to average 2 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the required data, and completing and reviewing the collection of information. If you Federal Communications Commission, AMD-PERM, Paperwork Reduction Project (3060-0678), Washington, DC 20554. We will also accept your comments regarding the Paperwork Reduction Act aspects of this collection via the Internet if you send them to PRA@fcc.gov. PLEASE have any comments on this burden estimate, or how we can improve the collection and reduce the burden it causes you, please write to the DO NOT SEND COMPLETED FORMS TO THIS ADDRESS.

Remember - You are not required to respond to a collection of information sponsored by the Federal government, and the government may not conduct or sponsor this collection, unless it displays a currently valid OMB control number or if we fail to provide you with this notice. This collection has been assigned an OMB control number of 3060-0678. THE FOREGOING NOTICE IS REQUIRED BY THE PAPERWORK REDUCTION ACT OF 1995, PUBLIC LAW 104-13, OCTOBER 1, 1995, 44 U.S.C. SECTION 3507.

## 12. Description

expected to be launched on April 18, 2018. Intelsat expects the LEOP period to last approximately E060384, to provide launch and early orbit phase services for the SES-12 satellite. SES-12 is commencing April 18, 2018, to use its Riverside, California Ku-band earth station, call sign Intelsat License LLC herein requests a grant of Special Temporary Authority for 180 days, 180 days.

## Exhibit A

## PETITION FOR WAIVER OF SECTIONS 25.137 AND 25.114

Pursuant to Section 25.137 of the Federal Communications Commission's ("Commission" or "FCC") rules, earth station applicants "requesting authority to communicate with a non-U.S. licensed space station" to serve the United States must demonstrate that U.S.-licensed satellite systems have effective competitive opportunities to provide analogues services in certain countries and must provide the same legal and technical information for the non-U.S.-licensed space station as required by Section 25.114 for U.S.-licensed space stations. Intelsat License LLC ("Intelsat") herein seeks authority to provide launch and early orbit phase ("LEOP") services—not commercial services—to the United States, and thus believes that Section 25.137 does not apply.<sup>2</sup>

To the extent the Commission determines, however, that Intelsat's request for authority to provide LEOP services on a special temporary basis is a request to serve the United States with a non-U.S.-licensed satellite, Intelsat respectfully requests a waiver of Sections 25.137 and 25.114 of the Commission's rules.<sup>3</sup> The Commission may grant a waiver for good cause shown.<sup>4</sup> The Commission typically grants a waiver where the particular facts make strict compliance inconsistent with the public interest.<sup>5</sup> In granting a waiver, the Commission may take into account considerations of hardship, equity, or more effective implementation of overall policy on an individual basis.<sup>6</sup> Waiver is therefore appropriate if special circumstances warrant a deviation from the general rule, and such a deviation will serve the public interest.

In this case, good cause exists for a waiver of both Section 25.137 and Section 25.114 of the FCC's rules. With respect to Section 25.114, Intelsat seeks authority only to provide LEOP services for the SES-12 satellite. The information sought by Section 25.114 is not relevant to LEOP services. Moreover, Intelsat does not have—and would not easily be able to obtain—such information because Intelsat is not the operator of the SES-12 satellite, nor is Intelsat in contractual privity with that operator. Rather, an affiliate of Intelsat has a contract with Airbus, the manufacturer of the SES-12 satellite, to conduct LEOP services.

<sup>47</sup> C.F.R. § 25.137.

See EchoStar Satellite Operating Company Application for Special Temporary Authority Related to Moving the EchoStar 6 Satellite from the 77° W.L. Orbital Location to the 96.2° W.L. Orbital Location, and to Operate at the 96.2° W.L. Orbital Location, Order and Authorization, 28 FCC Rcd. 4229 (2013) (noting that operating TT&C earth stations in the United States with a foreign-licensed satellite does not constitute "DBS service").

<sup>&</sup>lt;sup>3</sup> 47 C.F.R. §§ 25.137 and 25.114.

<sup>&</sup>lt;sup>4</sup> 47 C.F.R. § 1.3.

<sup>&</sup>lt;sup>5</sup> N.E. Cellular Tel. Co. v. FCC, 897 F.2d 1164, 1166 (D.C. Cir. 1990) ("Northeast Cellular").

<sup>&</sup>lt;sup>6</sup> WAIT Radio v. FCC, 419 F.2d 1153, 1159 (D.C. Cir. 1969); Northeast Cellular, 897 F.2d at 1166.

The information required under Section 25.114 of the FCC's rules is not necessary to determine potential harmful interference. The Schedule S information for this satellite would pertain to the operation of the SES-12 satellite at its final orbital location. However, the present application for LEOP services involves communications *prior* to the satellite attaining its final location in the geostationary orbit. In other words, during the LEOP mission, the earth station will not be communicating with a satellite located in the geostationary orbit. Rather, it will be transmitting to a satellite traveling on its "transfer orbit" or "LEOP path," which starts immediately following its separation from a launch vehicle, and ends when the satellite reaches its geostationary orbital location. Moreover, as with any STA, Intelsat will perform the LEOP services on a non-interference basis.

Because it is not relevant to the service for which Intelsat seeks authorization, and because obtaining the information would be a hardship, Intelsat seeks a waiver of all the information required by Section 25.114 of the Commission's rules. Intelsat has provided in this STA request the required technical information that is relevant to the LEOP services for which Intelsat seeks authorization.

Good cause also exists to waive Section 25.137 of the agency's rules. Section 25.137 is designed to ensure that "U.S.-licensed satellite systems have effective competitive opportunities to provide analogous services" in other countries. Here, there is no service being provided by the satellite; it is simply being placed in its orbital location after separating from the launch vehicle. Thus, the purpose of Section 25.137 would not be served by applying these rules to LEOP services. For example, Section 25.137(d)(4) requires earth station applicants requesting authority to operate with a non-U.S.-licensed space station that is not in orbit and operating to post a bond. The underlying purpose of Section 25.137(d)(4)—to provide parity between U.S.-licensed and non-U.S.-licensed commercial satellite systems in discouraging orbital location warehousing—would not be served by requiring Intelsat to post a bond to provide approximately 180 days of LEOP services to the SES-12 satellite.

It is Intelsat's understanding that SES-12 is licensed by the Netherlands, which is a WTO-member country. Thus, the purpose of Section 25.137—to ensure that U.S. satellite operators enjoy "effective competitive opportunities" to serve certain foreign markets—will not be undermined by grant of this waiver request.

Finally, Intelsat notes that it expects to operate with the SES-12 satellite using its U.S. earth station for a period of approximately 180 days. Requiring Intelsat to obtain copious technical and legal information from an unrelated party, where there is no risk of harmful interference and the operations will cease after approximately 180 days, would pose undue hardship without serving underlying policy objectives. Given these particular facts, the waiver sought herein is plainly appropriate.

<sup>&</sup>lt;sup>7</sup> 47 C.F.R. § 25.137(a).

<sup>&</sup>lt;sup>8</sup> See 47 C.F.R. §25.137(d)(4).

## Intelsat License LLC Riverside, California

## Vertex/RSI 9M 9 Meter Earth Station

## 1. Background

This Exhibit is presented to demonstrate the extent to which the Intelsat License LLC ("Intelsat") satellite earth station in Riverside, California is in compliance with the Federal Communications Commision ("FCC") Report and Order 96-377. The potential inteference from the earth station to U.S. Navy shipboard radiolocation operations ("RADAR") and the National Aeronautics and Space Administration ("NASA") space research activities in the 13.75-14.0 GHz band is addressed in this exhibit. The parameters for the earth station are:

33° 47′ 47.3″ N, 117° 5′ 15″ W

Coordinates (NAD83):

Satellite Arc Range for Earth Station: SES-12 at 53°W to 190°W

Satellite Archange for Larth Station.

Frequency Band: 13.75-14.00 GHz

Polarizations: Linear & Circular

Emissions: 800KF7D

Modulation: FM/BPSK/NRZ-L

Maximum Aggregate Uplink EIRP: 85dBW for all Carriers

**Transmit Antenna Characteristics** 

Antenna Size: 9 Meters in Diameter

Anenna Type/Model: Vertex/RSI 9M

Gain: 60.1 dBi

RF Power into Antenna Flange: 24.9 dBW or 1.9 dBW/4kHz

Minimum Elevation Angle: 12.81° @ 100.19° Azimuth

5.47° @ 260.3° Azimuth

Side Lobe Antenna Gain FCC Reference Pattern

Because the above uplink spectrum is shared with the Federal Government, coordination in this band requires resolution data pertaining to potential interference between the earth stations and both U.S. Navy Department and NASA systems. Potential intefference from the earth station could impact the U.S. Navy and/or NASA systems in two areas. These areas are noted in GCC Report and Order 96-377 dated September 1996, and consist of (1) Radiolocation and Radio Navigation, (2) Data Relay Satellites.

## <u>Summary of Coordination Issues:</u>

- a.) Potential Impact to Government Radiolocation (Shipboard Radar)
- b.) Potential Impact to NASA Tracking and Data Relay Satellite Systems ("TDRSS")

## 2. Potential Impact to Government Radiolocation (Shipboard Radar)

Radiolocation operations ("RADAR") may occur anywhere in the 13.4-14.0 GHz frequency band aboard ocean-going U.S. Navy ships. FCC order 96-377 allocates the top 250MHz of this 600 MHz band to the Fixed Satellite Service ("FSS") on a co-primary basis with the radiolocation operations and provides for an interference protection level of -167 dBW/m<sup>2</sup>/4kHz.

The closest distance to the shoreline from Riverside, California earth station is approximately 63 km southwest toward the Pacific Ocean. The calculation of the power spectral density at this distance is given by:

1. Clear Sky EIRP: 85 dBW 2. Carrier Bandwidth: 800 kHz

3. PD at antenna input: 1.9 dBW/4kHz 4. Transmit Antenna Gain: 60.1 dBi

5. Antenna Gain to Horizon: 12.8° @ 100.2° azimuth 6. Antenna Elevation Angles:

5.5° @ 260.3° azimuth

The earth station will radiate interference toward the ocean according to its off-axis side-lobe performance. A conservative analysis, using FCC standard reference pattern, results in an off-axis antenna gain of 1.3 towards the Pacific Ocean.

1.3 dBi

The signal density at the shoreline, through free space is:

PFD = Antenna Feed Power density (dBW/4kHz) + Antenna Off-Axis Gain (dBi) - Spread Loss (dBW/m²)

 $= 1.9 dBW/4kHz + 1.3 dBi - (10*log[4*PI*[63km]^2))$ 

= -103.8 dBW/m/4kHz - Additional Path Losses (63.4 dB)

Our calculation indicate additional path loss of approximately 63.4 dB including absorbtion loss and earth diffraction loss for the actual path profiles from the earth station to the nearest shoreline.

The calculated PFD, including additional path losses to the closest shoreline, is -167.2dbW/ m^2/4 kHz. This is 0.2dB below the -167.0 dBW/ m^2/4 kHz interference criteria of the R&O 96-377. Therefore, there should be no interference to the U.S. Navy RADAR from the Riverside, California earth station due to the distance and the terrain blockage between the site and the shore.

## 3. Potential Impact to NASA's Tracking and Data Relay Satellite System

The geographic location of the Intelsat earth station in Riverside, California is outside the 390 km radius coordination contour surrounding NASA's White Sands, New Mexico ground station complex. Therefore the TDRSS space-to-earth link will not be impacted by the Intelsat earth station in Riverside, California.

The TDRSS space-to-space link in the 13.772 to 13.778 GHz band is assumed to be protected if an earth station produces and EIRP of less than 71 dBW/6MHz in this band. The 9 meter earth station antenna will not transmit in this band. Therefore, there will be no potential interference to the TDRSS space-to-space link.

## 4. Coordination Result Summary and Conclusions

The results of the analysis and calculation performed in this exhibit indicate that compatible operation between the earth station at the Riverside, California facility and U.S. Navy and NASA TDRSS space-to-earth and space-to-space links are possible. No interference to U.S. Navy RADAR or NASA TDRSS operations from the Riverside, California site earth station should occur.

February 26, 2018

Ms. Marlene H. Dortch Secretary Federal Communications Commission 445 12th Street, SW Washington, DC 20554

Re:

Request for Special Temporary Authority to Provide LEOP Services for SES-12

Riverside, California Earth Station E060384, File No. SES-STA-20180207-00098

Dear Ms. Dortch:

Intelsat License LLC ("Intelsat") hereby supplements its above-referenced pending application to clarify that Intelsat intends to operate in the 13.75-14.0 GHz band using an 800KF7D emissions carrier with the following maximum EIRP density levels:

Max EIRP Density/	Max EIRP Density/	Max EIRP Density/
1 Hz (dBW)	4 KHz (dBW)	6 MHz (dBW)
25.97	61.99	93.75

Please direct any questions regarding this STA request to the undersigned at (703) 559-6949.

Respectfully submitted,

/s/ Susan H. Crandall
