Re: Request for Special Temporary Authority
File No. SES-STA-20180711-01659

Dear Ms. Dortch:

Intelsat License LLC herein supplements the above referenced request to update the frequencies requested. The second paragraph should now read:

The EUTELSAT-WA operations will be performed in the following center frequencies: **2085.688 MHz in the uplink (RHCP and LHCP) and 2265.0 MHz in the downlink (RHCP and LHCP)**. The drift operations will be coordinated with all operators of satellites that use the same frequency bands. In the extremely unlikely event that harmful interference should occur due to transmissions to or from its earth station, Intelsat will take all reasonable steps to eliminate the interference.

Please direct any further questions regarding this STA supplement to the undersigned at (703) 559-6949.

Sincerely,

/s/ Cynthia J. Grady
