| Application for Special Temporary Authority (Call Sign E950499) |) | |
| |) | |

**APPLICATION OF DG CONSENTS SUB, INC.
FOR SPECIAL TEMPORARY AUTHORITY**

DG Consents Sub, Inc. (“DigitalGlobe”) seeks special temporary authority (“STA”) for 60 days, commencing July 27, 2018, to add a new antenna to fixed earth station license E950499 in Fairbanks, Alaska.¹ DigitalGlobe will file a modification application for permanent authority for the new antenna with complete technical specifications.² In the interim, grant of STA will serve the public interest by allowing DigitalGlobe to upgrade its communications infrastructure to better serve its earth exploration satellite service customers.

Specifically, DigitalGlobe requests STA to operate a ViaSat 5.4m V8X-Y antenna in a radome. As shown in Exhibit 1, the antenna will be co-located with its currently-authorized Datron 7.3m 8300 antenna. The ViaSat antenna will utilize the same power levels, S-band transmit frequencies (i.e., 2042 MHz, 2052 MHz, 2085.6875 MHz 2092.6 MHz, and 2094.896 MHz) for TT&C, and X-band receive frequencies (i.e., 8025-8400 MHz) as the Datron antenna, and it will communicate with the same space stations as currently authorized under E950499.

¹ 47 C.F.R. § 25.120(b)(3). DigitalGlobe has filed its STA request, FCC Form 159, a \$200.00 filing fee and this supporting letter electronically via the International Bureau’s Filing System (“IBFS”).

² Because DigitalGlobe plans to file an application for regular authority, the FCC may grant this STA without public notice. 47 C.F.R. § 25.120(b)(3).

The ViaSat antenna will also be controlled via remote control from 1601 Dry Creek Drive, Suite 26, Longmont, Colorado, 80503. Per Rule 17.7, DigitalGlobe certifies that the new ViaSat antenna does not require FAA antenna structure notification.³

DigitalGlobe understands that all operations pursuant to a grant of STA will be on a non-interference basis. As the new antenna will utilize the same frequencies as its currently operating antenna, DigitalGlobe does not anticipate that operation of the new antenna will cause any harmful interference or adversely affect any other authorized users. In the unlikely event harmful interference does occur, DigitalGlobe will take all steps necessary to eliminate such interference. The point of contact for technical questions or interference concerns is:

Tony Mumm, Manager of Remote Ground Stations, 303-684-4792.

DigitalGlobe further understands that any grant of STA will be without prejudice to action on the soon-to-be filed modification application to add this antenna.

Grant of this STA request will allow DigitalGlobe to upgrade its ground-based communications network. DigitalGlobe has installed the new antenna at the Fairbanks, Alaska site and is ready to commence operations. Doing so will enhance the provision of service to earth exploration satellite service customers and thereby promotes the public interest.

³ See 47 C.F.R. § 17.7.

For the reasons set forth above, DigitalGlobe respectfully requests that the Commission grant this STA.

Respectfully submitted,
