FCC NOTICE REQUIRED BY THE PAPERWORK REDUCTION ACT

The public reporting for this collection of information is estimated to average 2 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the required data, and completing and reviewing the collection of information. If you have any comments on this burden estimate, or how we can improve the collection and reduce the burden it causes you, please write to the Federal Communications Commission, AMD-PERM, Paperwork Reduction Project (3060-0678), Washington, DC 20554. We will also accept your comments regarding the Paperwork Reduction Act aspects of this collection via the Internet if you send them to PRA@fcc.gov. PLEASE DO NOT SEND COMPLETED FORMS TO THIS ADDRESS.

Remember – You are not required to respond to a collection of information sponsored by the Federal government, and the government may not conduct or sponsor this collection, unless it displays a currently valid OMB control number or if we fail to provide you with this notice. This collection has been assigned an OMB control number of 3060-0678.

THE FOREGOING NOTICE IS REQUIRED BY THE PAPERWORK REDUCTION ACT OF 1995, PUBLIC LAW 104-13, OCTOBER 1, 1995, 44 U.S.C. SECTION 3507.

12. Description

Lockheed Martin Corporation hereby requests Special Temporary Authority beginning August 18, 2018, to operate its Carpentersville, NJ fixed earth station (Call Sign E7541) to provide telemetry, tracking and control (TT&C) functions In support of Launch and Early Orbit Phase operations for the Telstar 18 VANTAGE mission. Specifically, authority is sought to transmit telecommand signals (Earth-to-space) in various 6 GHz frequencies, and to receive telemetry signals from the satellite (space-to-Earth) in 3/4 GHz frequencies.

Applicant: Lockheed Martin Corporation
Call Sign: E7541
File No.: SES-STA-20180803-02092
Special Temporary Authority (STA)

Lockheed Martin Corporation ("Lockheed Martin") is granted STA for 30 days starting September 06, 2018 to operate its earth station in Carpentersville, NJ to provide telemetry, tracking, and control ("TT&C") functions during the launch and early orbit phase ("LEOP") in support of ranging and propulsion monitoring for the Telstar 18 VANTAGE satellite with in-service operation at 138.0° E.L. orbital location. Operations shall utilize frequency bands 6415.00 MHz - 6431.00 MHz and 6639-6657 MHz (Earth-to-space). Operations are authorized under the following conditions:

1. Operations will not exceed the operational power levels and parameters coordinated.
2. In the event of any harmful interference Lockheed Martin shall cease operations immediately upon notification of such interference, and shall immediately inform the Commission, in writing, of such an event.
3. Grant of this STA is without prejudice to any determination that the Commission may make regarding pending or future Lockheed Martin applications.
4. Any action taken or expense incurred as a result of operations pursuant to this STA is solely at Lockheed Martin's risk.
5. The 24/7 point of contact for this 18VANTAGE mission is as follows: Mr. Usarzewicz-(609) 865-2658 (cellular) and (908) 859-4050 (earth station desk).

This grant is issued pursuant to Section 0.26 1 of the Commission's rules on delegated authority, 47 C.F.R. § 0.261, and is effective upon release.

30 days *"with conditions"*

 GRANTED International Bureau	<p>File # <u>SES-STA-20180803-02092</u></p> <p>Call Sign <u>E7541</u> Grant Date <u>09/06/2018</u> (or other identifier)</p> <p>Term Dates From: <u>09/06/2018</u> To: <u>10/06/2018</u></p> <p>Approved: <u>Paul E. Bladet</u></p>
---	---

Description of Operations and Public Interest Statement

Pursuant to 47 CFR 25.120 of the Commission's Rules, Lockheed Martin Corporation ("Lockheed Martin") hereby requests Special Temporary Authority ("STA") for a period of thirty (30) days to operate its Carpentersville, New Jersey fixed earth station (Call Sign E7541) to provide telemetry, tracking, and control ("TT&C") functions during the launch and early orbit phase ("LEOP") in support of ranging and propulsion monitoring for the Telstar 18 VANTAGE satellite. Telstar 18-V is destined for in-service operation at 138.0° E.L., and is currently scheduled for launch in mid-August 2018, aboard a Falcon 9 heavy rocket, from Cape Canaveral, Florida.

Accordingly, Lockheed Martin requests authority to begin communications on August 18, 2018, in preparation for the start of the LEOP mission.

Requested STA Operations.

The TT&C and ranging signals will be transmitted in the 6.0 GHz C-band frequencies using the earth station facility for which Lockheed Martin already has authority under Call Sign E7541. However, to ensure no risk of interference with adjacent microwave operators, Lockheed Martin has coordinated use of the 6415-6431 and 6639-6657 MHz bands to transmit to the satellite. In all other respects, operation of the earth station will be consistent with the parameters set forth under the existing permanent authority.

Lockheed Martin is requesting that the duration of this STA be a total of thirty (30) days. Lockheed Martin also designates Michael Usarzewicz to be the contact person that will be available whenever transmission to Telstar 18-V is to occur through the subject earth station. Mr. Usarzewicz can be reached at the following phone numbers:

(609) 865-2658 (cellular)
(908) 859-4050 (earth station desk)

Grant of the Requested Authority Will Serve the Public Interest.

Lockheed Martin believes that the limited operations it proposes in support of the launch of the Telstar 18-V satellite serve the public interest. Lockheed Martin understands that the Telstar 18-V satellite will provide high-throughput communications services in the Asia-Pacific region. Lockheed Martin's Carpentersville earth station will be part of a global network of control and ranging facilities that will be used solely to position the satellite as it progresses from transfer orbit to its final location. No end user service will be provided within the United States at any time. The safe and orderly use of the entire geostationary orbital resource and protection of the hundreds of satellites licensed by the U.S. and other countries that operate there depends in no small part on ensuring that the Telstar 18-V satellite is controlled while over North America en route to its final geostationary orbital position. In this regard, Lockheed Martin's earth station thus will serve a vital function.

* * * * *

Based on the foregoing Lockheed Martin requests authority to operate its Carpentersville, NJ earth station antenna to provide critical TT&C and ranging services during the LEOP mission of the Telstar 18 VANTAGE satellite, for a term of 30 days, commencing August 18, 2018.

In support of this request, Lockheed Martin provides the following technical details:

Satellite Characteristics

Satellite:

Telstar 18 VANTAGE

Orbital Location:

138 E.L.

Manufacturer:

Space Systems Loral

Transponders:

C-band / Ku-band

Earth Station Characteristics

Antenna:

14.2-m TIW Systems

Antenna Location: 40°38' 39.1" N / 075° 11' 27.8" W

Telecommand Uplink Frequencies:

6415-6431 MHz (RHCP)

6639-6657 MHz (RHCP)

Telemetry Downlink Frequencies:

3623 MHz (LHCP)

3625 MHz (LHCP)

4199 MHz (LHCP)

Antenna Gain: 63.9 dBi @ 6 GHz

Antenna Power: 20.1 dBW (into the flange)

Maximum EIRP: 84.9 dBW for all carriers

EIRP Density: 23.0 dBW/4kHz

Uplink Emission:

16K0F3D – 27K7G3N

Downlink Emission:
320KG3D

FREQUENCY COORDINATION AND INTERFERENCE ANALYSIS REPORT

Prepared for
Lockheed Martin Corporation-Phillipsburg
CARPENTERSVILLE, NJ
Satellite Earth Station

Prepared By:
COMSEARCH

August 02, 2018

TABLE OF CONTENTS

1. CONCLUSIONS	3
2. SUMMARY OF RESULTS	4
3. SUPPLEMENTAL SHOWING	5
4. EARTH STATION COORDINATION DATA	10
5. CERTIFICATION.....	14

1. CONCLUSIONS

An interference study considering all existing, proposed and prior coordinated microwave facilities within the coordination contours of the proposed earth station demonstrates that this site will operate satisfactorily with the common carrier microwave environment. Further, there will be no restrictions of its operation due to interference considerations.

2. SUMMARY OF RESULTS

A number of great circle interference cases were identified during the interference study of the proposed earth station. Each of the cases, which exceeded the interference objective on a line-of-sight basis, was profiled and the propagation losses estimated using NBS TN101 (Revised) techniques. The losses were found to be sufficient to reduce the signal levels to acceptable magnitudes in every case.

3. SUPPLEMENTAL SHOWING

Pursuant to Part 25.203(c) of the FCC Rules and Regulations, the satellite earth station proposed in this application was coordinated by Comsearch using computer techniques and in accordance with Part 25 of the FCC Rules and Regulations.

Coordination data for this earth station was sent to the below listed carriers with a letter dated 07/12/2018.
