Call Sign: None
Special Temporary Authority (STA)

Universal Space Network, LLC (USN) is granted special temporary authority for 180 days, beginning February 13, 2019 to operate its Naalehu, HI fixed earth station to support the Launch and Early Operation Phase (LEOP) and Lunar landing mission of the SpaceIL Israeli lunar mission on center frequencies 2099.500MHz (Earth-to-space) and 2280.000 MHz (space-to-Earth). USN is authorized to support the mission from LEOP thru lunar orbit transfer and to continue support of the lander on the Moon for 6 days.

1. Operations shall be on an unprotected, non-interference basis with respect to other authorized stations, including federal stations.
2. Any future requests or extensions will need to submit applications to the FCC to be re-coordinated with NTIA.
3. Any action taken or expense incurred as a result of operations pursuant to this STA is solely at USN's risk.
4. The 24x7 contact at 215-328-9130 must be available during all operations with the SPACEIL spacecraft

This grant is issued pursuant to Section 0.261 of the Commission's rules on delegated authority, 47 C.F.R. § 0.261, and is effective upon release.

FCC NOTICE REQUIRED BY THE PAPERWORK REDUCTION ACT

The public reporting for this collection of information is estimated to average 2 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the required data, and completing and reviewing the collection of information. If you have any comments on this burden estimate, or how we can improve the collection and reduce the burden it causes you, please write to the Federal Communications Commission, AMD-PERM, Paperwork Reduction Project (3060-0678), Washington, DC 20554. We will also accept your comments regarding the Paperwork Reduction Act aspects of this collection via the Internet if you send them to PRA@fcc.gov. PLEASE DO NOT SEND COMPLETED FORMS TO THIS ADDRESS.

Remember – You are not required to respond to a collection of information sponsored by the Federal government, and the government may not conduct or sponsor this collection, unless it displays a currently valid OMB control number or if we fail to provide you with this notice. This collection has been assigned an OMB control number of 3060-0678.

THE FOREGOING NOTICE IS REQUIRED BY THE PAPERWORK REDUCTION ACT OF 1995, PUBLIC LAW 104-13, OCTOBER 1, 1995, 44 U.S.C. SECTION 3507.

Exhibit C
**PETITION FOR WAIVER OF SECTION 25.137 AND 25.114 AND OF
THE U.S. TABLE OF FREQUENCY ALLOCATIONS**

**I. TO THE EXTENT THEY APPLY, GOOD CAUSE EXISTS FOR A WAIVER OF
CERTAIN PORTIONS OF SECTIONS 25.137 AND 25.114**

Universal Space Network, Inc. (USN) is provided limited legal and technical information for the SPACEIL Lunar surface landing mission satellite.¹ Pursuant to Section 25.137 of the Federal Communications Commission's ("Commission" or "FCC") rules, the same technical information required by Section 25.114 for U.S.-licensed space station, and certain legal information, must be submitted by earth station applicants "requesting authority to operate with a non-U.S. licensed space station to serve the United States..."² USN seeks authority to support the needed Telemetry, Tracking, and Control ("TT&C") during launch and early orbit support ("LEOP") and Lunar support of the SPACEIL spacecraft from launch to Lunar surface landing, not commercial service to the United States, and thus believes that Section 25.137 does not apply.

To the extent the Commission determines, however, that USN's request for authority to provide LEOP on a special temporary basis is a request to serve the United States with a non-U.S.-licensed satellite, USN respectfully requests a waiver of Sections 25.137 and 25.114 of the Commission's rules, to the extent that USN has not herein provided the information required by these rules.³ The Commission may grant a waiver for good cause shown.⁴ A waiver is therefore appropriate if special circumstances warrant a deviation from the general rule, and such a deviation will serve the public interest.

In this case, good cause for a waiver of portions of Section 25.114 exists. USN seeks authority only to conduct LEOP and Lunar support for SPACEIL. Thus, any information sought by Section 25.114 that is not relevant to the LEOP – e.g., antenna patterns, energy and propulsion and orbital debris - USN does not have. In addition, USN would not easily be able to obtain such information because USN is not the operator of the SPACEIL satellite, nor is USN in contractual privity with that operator. Rather, USN has contracted with Swedish Space Corporation, Solna Sweden (SSC) to support the Launch and Early Orbit (LEOP) and Lunar support in S-Band during the mission.

As evidenced by the Comsearch report attached to this request, USN has coordinated the LEOP of the SPACEIL satellite with potentially affected terrestrial operators. Moreover, as with any STA, USN will conduct the LEOP on an unprotected, non-interference basis to government operations.

¹ FCC Form 312 Section B

² 47 C.F.R. § 25.137(a)

³ 47 C.F.R. §§25.137 and 25.114

⁴ 47 C.F.R. §1.3

Because it is not relevant to the service for which USN seeks authorization, and because obtaining the information would be a hardship, USN seeks a waiver of all the technical and legal information required by Section 25.114, to the extent it is not provided herein. As noted above, USN has provided the required information to the extent that it is relevant to the LEOP service for which USN seeks authorization.

Good cause also exists to waive portions of Section 25.137, to the extent the information required is not herein provided. Section 25.137 is designed to ensure that “U.S.-licensed satellite systems have effective competitive opportunities to provide analogous services” in other countries. Here, there is no service being provided by the satellite; USN is providing TT&C while the satellite is on the way to Lunar landing. Thus, the purpose of the information required by Section 25.137 is not implicated here. For example, Section 25.137(d) requires earth station applicants requesting authority to operate with a non-U.S.-licensed space station that is not in orbit and operating to post a bond.⁵ The underlying purpose in having to post a bond – i.e., to prevent warehousing of orbital locations by operators seeking to serve the United States – would not be served by requiring USN to post a bond in order to conduct 63 days of support of the SPACEIL satellite.

It is USN’s understanding that SPACEIL is licensed by the state of Israel. SPACEIL is a mission inspired by the Google Lunar XPRIZE and is sponsored for educational purposes of Science, Technology, Engineering, and Mathematics (STEM). Thus, the purpose of Section 25.137 – to ensure that U.S. satellite operators enjoy “effective competitive opportunities” to serve foreign markets and to prevent warehousing of orbital locations service the United States – will not be undermined by grant of this waiver request.

Finally, USN notes that it expects to communicate with the SPACEIL satellite using its U.S. earth station for a period of 63 days. Requiring USN to obtain technical and legal information from an unrelated party, where there is no risk of interference and the operation will cease within 63 days would pose undue hardship without serving underlying policy objectives. Given these particular facts, the waiver sought herein is appropriate.

⁵ 47 C.F.R. §25.137(d)(4)

II. GOOD CAUSE EXISTS FOR A WAIVER OF THE UNITED STATES TABLE OF FREQUENCY ALLOCATIONS

USN further requests a waiver of the United States Table of Frequency Allocations ("U.S. Table") as described in section 2.106 of the rules for the frequency bands 2025 – 2110 MHz (Earth-to-Space) and 2200 – 2290 MHz (Space-to-Earth).⁶ Section footnotes allow for non-federal Government use of these bands in the United States on a case-by-case non-interference basis. Such use by USN necessitates a waiver of the U.S. Table.

Good cause exists to grant USN a limited waiver of the U.S. Table to allow LEOP of the SPACEIL satellite. In considering request for case-by-case spectrum uses, the Commission has indicated that it would generally grant such waivers "where there is little potential for interference into any service authorized under the Table of Frequency Allocations and when the case-by-case operator accepts any interference from authorized services."⁷ USN will coordinate with other parties operating communication systems in compliance with the Table of Frequency Allocations to ensure that no harmful interference is caused. USN seeks to operate only pursuant to special temporary authorization and thus agrees to accept any interference from authorized services. In summary, USN's operation on a non-interference, non-protected basis support waiver of the U.S. Table.

⁶ 47 C.F.R. §2.106

LEOP support of SpacellL lunar mission from USN's Hawaiian ground station

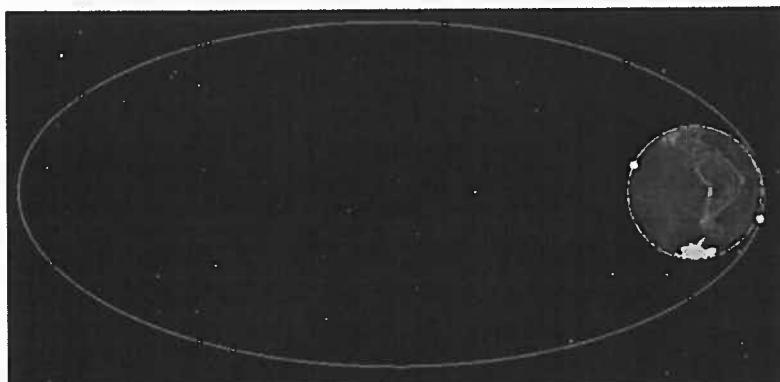

Originally inspired by the Google Lunar XPRIZE, SpacellL will softly land a spacecraft on the lunar surface for a period of time and relay high resolution photos to Earth. SpacellL is a non-profit organization founded in Israel to inspire young people to pursue Science, Technology, Engineering, and Math (STEM). The mission will launch on a SpaceX Falcon-9 from Florida on December 18th, 2018 at 16:30 UTC as a secondary payload. USN has been contracted to support the mission from USN's Hawaiian ground station from orbital injection thru visibility of spacecraft on the lunar surface for a total nominal mission time of about 63 days.

The mission phases consist of initial Earth orbit for a period of 30 days, followed by a lunar transfer maneuver lasting 6.5 days, followed by Lunar orbit for approximately 20 days mapping the magnetic field, then a Lunar landing in February 2019 for a period of up to 6 days. USN will support the spacecraft during all phases for a period of approximately 63 days depending mission successful operations. The spacecraft operates on the following S-band frequencies.

	Downlink	Uplink
SpacellL	2280.000 MHz	2099.500 MHz

Spacecraft injection

The Falcon-9 will initially inject the spacecraft into a highly elliptical orbit for a nominal 30 day period. This orbit will have a super-geosync apogee of about 55,000 Km. Hawaii will conduct pass supports for a nominal 30 minute duration every 4 hours of available visibility. Visibility from Hawaii ranges from 4 hours to 14 hour each day during this phase of the mission. The initial orbit is defined below and the potential USN Hawaii supports.

Initial Orbit Phase

Initial Orbit has been defined with the following state vector:

Epoch Time: 18 Dec 2018 17:52:48 UTC

X: 6189.65 Km

Y: 2913.71 Km

Z: -1651.60 Km

X Velocity: -2.55056 Km/sec

Y Velocity: 8.70091 Km/sec

Z Velocity: -4.49232 Km/sec

Spacell Injection Visibility from USN-Hawaii

*Note that the Lunar transfer orbit burn occurs during this pass and completes at 17:33:25

Lunar Transfer Orbit

The SpacELL lander contains its own booster propulsion system as this is required to softly land on the Moon, as such this booster will also be used to conduct an orbital maneuver burn to place the spacecraft into a heliocentric Lunar transfer orbit. This burn is scheduled to complete at 18 Jan 2019 17:33:25 UTC. The spacecraft traverses towards the Moon for approximately 6.5 days and will then conduct a Lunar orbit injection burn and enter Lunar orbit at 25 Jan 2019 00:13:25 UTC.

The transfer orbit is defined by the STK state vector file:
SIL-00-LunarTransferOrbit.e

Lunar Transfer Orbit

Hawaii will conduct pass supports for a nominal 30 minute duration every 4 hours of available visibility. Visibility from Hawaii ranges from 10 to 11 hours each day during this phase of the mission. The potential USN Hawaii supports are shown below.

Access	Start Time (UTCG)	Stop Time (UTCG)
1	20 Jan 2019 07:42:14	20 Jan 2019 18:38:57
2	21 Jan 2019 08:03:49	21 Jan 2019 19:07:37
3	22 Jan 2019 08:12:07	22 Jan 2019 19:22:04
4	23 Jan 2019 08:17:02	23 Jan 2019 19:31:55
5	24 Jan 2019 08:20:29	24 Jan 2019 19:39:46
6	25 Jan 2019 08:22:46	25 Jan 2019 19:45:33

Lunar Surface Support

USN-Hawaii will support the spacecraft when in view of the Lunar landing location for the duration of the mission as scheduled for periods of 40 minutes duration. Lunar surface support is expect to not exceed 6 days.

Flux Density impinging on the ground in Hawaii from Spacell

The Flux density is calculated as:

$$\text{Flux density} = \text{EIRP} \div (4\pi Rse^2)$$

Where Rse is the distance from spacecraft to the ground?

Where $EIRP$ is the Effective Isotropic Radiated Power of the spacecraft?

The spacecraft has two mission antennas, Low Gain omni (LGTA), and High Gain directional (HGTA). The LGTA will be used exclusively in Earth orbit and has an EIRP of 2.1 dBW. The HGTA has an EIRP of 12.66 dBW and will be deployed at a time the spacecraft is about one third of the way to the moon during the lunar orbit transfer. For worse case analysis the LGTA will have a minimum altitude over Hawaii of 500 Km, and the HGTA will have a minimum altitude of 150,000 Km.

Earth Orbit LGTA:

Converting 2.1 dBW to scalar watts = 1.622 watts transmitted at 2280.0 MHz

Therefor:

$$\text{Flux density} = 1.622 \div (4\pi * 500,000 \text{ meters}^2)$$

$$\text{Flux density} = 5.163 \times 10^{-13} \text{ Watts/meter}^2$$

Or

$$\text{Flux density} = 5.136 \times 10^{-14} \text{ mW/cm}^2$$

Lunar Transfer, Lunar Orbit, and Lunar Surface HGTA:

Converting 12.66 dBW to scalar watts = 18.450 watts transmitted at 2280.0 MHz

Therefor:

$$\text{Flux density} = 18.45 \div (4\pi * 150,000,000 \text{ meters}^2)$$

$$\text{Flux density} = 6.525 \times 10^{-17} \text{ Watts/meter}^2$$

Or

$$\text{Flux density} = 6.525 \times 10^{-18} \text{ mW/cm}^2$$

FREQUENCY COORDINATION AND INTERFERENCE ANALYSIS REPORT

**Prepared for
Universal Space Network, Inc.
NAALEHU, HI
Satellite Earth Station**

**Prepared By:
COMSEARCH

Ashburn, VA 20147
July 27, 2018**

TABLE OF CONTENTS

1. CONCLUSIONS	3
2. SUMMARY OF RESULTS	4
3. SUPPLEMENTAL SHOWING	5
4. EARTH STATION COORDINATION DATA.....	7
5. CERTIFICATION.....	11

1. CONCLUSIONS

An interference study considering all existing, proposed and prior coordinated microwave facilities within the coordination contours of the proposed earth station demonstrates that this site will operate satisfactorily with the common carrier microwave environment. Further, there will be no restrictions of its operation due to interference considerations.

2. SUMMARY OF RESULTS

A number of great circle interference cases were identified during the interference study of the proposed earth station. Each of the cases, which exceeded the interference objective on a line-of-sight basis, was profiled and the propagation losses estimated using NBS TN101 (Revised) techniques. The losses were found to be sufficient to reduce the signal levels to acceptable magnitudes in every case.

3. SUPPLEMENTAL SHOWING

Pursuant to Part 25.203(c) of the FCC Rules and Regulations, the satellite earth station proposed in this application was coordinated by Comsearch using computer techniques and in accordance with Part 25 of the FCC Rules and Regulations.

Coordination data for this earth station was sent to the below listed carriers with a letter dated 07/17/2018.

5. CERTIFICATION

I HEREBY CERTIFY THAT I AM THE TECHNICALLY QUALIFIED PERSON RESPONSIBLE FOR THE PREPARATION OF THE FREQUENCY COORDINATION DATA CONTAINED IN THIS APPLICATION, THAT I AM FAMILIAR WITH PARTS 101 AND 25 OF THE FCC RULES AND REGULATIONS, THAT I HAVE EITHER PREPARED OR REVIEWED THE FREQUENCY COORDINATION DATA SUBMITTED WITH THIS APPLICATION, AND THAT IT IS COMPLETE AND CORRECT TO THE BEST OF MY KNOWLEDGE AND BELIEF.

DATED: July 27, 2018

FCC 312
Schedule B

Schedule B

FEDERAL COMMUNICATIONS COMMISSION
APPLICATION FOR SATELLITE SPACE AND EARTH STATION A
Technical and Operational Description

License of New Station

Moc
t to a Pending Application

- Amendment to a Pending Application
- Modification of License/Registration
- Notification of Minor Modification

BB1. Location of Earth Station Site. If temporary-fixed, mobile, or VSAT remote facility, specify area of operation and point of contact. If VSAT hub station, give its location
For VSAT networks attach individual Schedule B, Page 1 sheets for each hub station and each remote station. Individually provide the

Location, Points of Communications, and Destination Points for each hub and remote station.	Identifier (HUB REMOTE1 etc.)	R/C Telephone Number	B/Li. Geographic Coordinates	N/S.	E/W	B/Li. Lat./Long.
---	-------------------------------	----------------------	------------------------------	------	-----	------------------

B1a. Station Call Sign USHI101	B1b. Site identifier (HUB, REMOTE1, etc.) 929-8069	B1c. Telephone Number (808) 929-8069	B1j. Geographic Coordinates Deg. - Min. - Sec. - E/W		B1k. Lat./Lon. Coordinates are:
B1d. Mailing Street Address of Station or Area of Operation 93-1704 South Point Road		B1e. Name of Contact Person Joanne Greet	Lat. 19° 00'	N/S 50.3° N	<input type="checkbox"/> NAD-27
B1f. City Naalehu	B1g. County Ka'u	B1h. State Hl	Lon. 155° 39'	E/W 46.6° W	<input checked="" type="checkbox"/> NAD-83
				B1i. Site Elevation (AMSL) 378.0	meters

B2. Points of Communications:

List the names and orbit locations of all satellites with which this earth station will communicate. The entry "ALSAT" is sufficient to identify the names and locations of all satellite facilities licensed by the U.S. All non-U.S. licensed satellites must be listed individually.

B3. Destination points for communications using non-U.S. licensed satellites. For each non-U.S. licensed satellite facility identified in section B2 above, specify the destination point(s) (countries) where the services will be provided by this earth station via each non-U.S. license satellite system. Use additional sheets as needed.

Satellite Name	List of Destination Points
SPACEIL (Lunar mission)	Israeli (Non US Spacecraft)

FEDERAL COMMUNICATIONS COMMISSION
APPLICATION FOR SATELLITE SPACE AND EARTH STATION AUTHORIZATIONS
FCC Form 312 - Schedule B: (Technical and Operational Description)

**APPLICATION FOR SATELLITE
FCC Form 312 - Schedule**

BS5 Antenna Heights and Maximum Power limits: The corresponding Antenna ID in tables B4 and B5 applies to the same antenna

Notes: * If this is an application for a VSAT network, identify the site (Item B1b, Schedule B, Page 1) where each antenna is located. Also include this Site-ID on Schedule B, Page 5.
** Identify each antenna in VSAT network or multi-antenna station with a unique identifier, such as HUB, REMOTE1, A1, A2, 10M, 12M, etc. Use this same antenna ID throughout tables B4, B5, B6, and B7 when referring to the same antenna.
*** Attach sketch of site or exemption. See 47 CFR Part 17.

APPLICATION FOR SATELLITE SPACE AND EARTH STATION AUTHORIZATIONS
FCC Form 312 - Schedule B: (Technical and Operational Description)

FCC Form 312 - Schedule B: (Technical and Operational Description)

B6. Frequency Coordination Limits: Use additional pages as needed.

Satellite Frequency Coordination Parameters as indicated						
(a) Antenna ID*	(b) Frequency Limits (MHz)	(c) Range of Satellite Arc Eastern Limit**	(d) Range of Satellite Arc Western Limit**	(e) Antenna Elevation Angle Eastern Limit	(f) Antenna Elevation Angle Western Limit	(g) Earth Station Azimuth Angle Eastern Limit
HI-13M	2280.000	0.0 W.L.	360.0 W.L.	5.0	5.0	
HI-13M	2099.500	0.0° W.L.	360.0° W.L.	5.0°	5.0°	

- * Provide the ANTENNA-ID from table B4 to identify the antenna to which each frequency band and orbital arc range is associated.

Operating with geostationary satellites, give the orbital arc limits and the associated elevation and azimuth angles. If operating with non-geostationary satellites, give the notation "NON-GEO" for the satellite arc and give the minimum operational elevation angle and the maximum azimuth angle range.

FEDERAL COMMUNICATIONS COMMISSION
APPLICATION FOR SATELLITE SPACE AND EARTH STATION AUTHORIZATIONS
FCC Form 312 - Schedule B: (Technical and Operational Description)

B7. Particulars of Operation (Full particulars are required for each r.f. carrier): Use additional pages as needed.

Notes: * Provide the ANTENNA-ID from table B4 to identify the antenna to which each frequency band and emission is associated. For VSAT networks, include frequencies and emissions for all HUB and

Notes: - Provide the AN/ENNA-12 UNIT (see D7) to identify units which contain
REMOTE UNITS.

Page 5: Questions

**FEDERAL COMMUNICATIONS COMMISSION
APPLICATION FOR SATELLITE SPACE AND EARTH STATION AUTHORIZATIONS
FCC Form 312 - Schedule B: (Technical and Operational Description)**

If VSAT Network, provide the SITE-ID (Item B1b) of the station that B8-B13 are in response to (HUB, REMOTE1, etc.): _____

B8. If the proposed antenna(s) operate in the Fixed Satellite Service (FSS) with geostationary satellites, do(es) the proposed antenna(s) comply with the antenna gain patterns specified in Section 25.209(a) and (b) as demonstrated by the manufacturer's qualification measurements? If NO, provide as an exhibit, a technical analysis showing compliance with two-degree spacing policy.	<input type="checkbox"/> YES	<input type="checkbox"/> NO	N/A
B9. If the proposed antenna(s) do not operate in the Fixed Satellite Service (FSS), or if they operate in the Fixed Satellite Service (FSS) with non-geostationary satellites, do(es) the proposed antenna(s) comply with the antenna gain patterns specified in Section 25.209(a2) and (b) as demonstrated by the manufacturer's qualification measurements?	<input checked="" type="checkbox"/> YES	<input type="checkbox"/> NO	
B10. Is the facility operated by remote control? If YES, provide the location and telephone number of the control point.	<input checked="" type="checkbox"/> YES	<input type="checkbox"/> NO	
Remote Control Point Location:			
B10a. Street Address 417 Caredean Drive Suite A	B10c. County Montgomery	B10d. State/Country PA	B10e. Zip Code 19044
B10b. City Horsham			
B10f. Telephone Number 215-328-9130	B10g. Call Sign of Control Station (if appropriate)		
B11. Is frequency coordination required? If YES, attach a frequency coordination report as an exhibit.			
<input checked="" type="checkbox"/> YES <input type="checkbox"/> NO			
B12. Is coordination with another country required? If YES, attach the name of the country(ies) and plot of coordination contours as an exhibit.			
<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO			
B13. FAA Notification - (See 47 CFT Part 17 and 47 CFT Part 25.113(c)) Where FAA notification is required, have you attached a copy of a completed FCC Form 854 and/or the FAA's study regarding the potential hazard of the structure to aviation? FAILURE TO COMPLY WITH 47 CFT PARTS 17 AND 25 WILL RESULT IN THE RETURN OF THIS APPLICATION			
<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO
