FCC NOTICE REQUIRED BY THE PAPERWORK REDUCTION ACT

The public reporting for this collection of information is estimated to average 2 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the required data, and completing and reviewing the collection of information. If you Federal Communications Commission, AMD-PERM, Paperwork Reduction Project (3060-0678), Washington, DC 20554. We will also accept your comments regarding the Paperwork Reduction Act aspects of this collection via the Internet if you send them to PRA@fcc.gov. PLEASE have any comments on this burden estimate, or how we can improve the collection and reduce the burden it causes you, please write to the DO NOT SEND COMPLETED FORMS TO THIS ADDRESS.

Remember – You are not required to respond to a collection of information sponsored by the Federal government, and the government may not conduct or sponsor this collection, unless it displays a currently valid OMB control number or if we fail to provide you with this notice. This collection has been assigned an OMB control number of 3060-0678. THE FOREGOING NOTICE IS REQUIRED BY THE PAPERWORK REDUCTION ACT OF 1995, PUBLIC LAW 104-13, OCTOBER 1, 1995, 44 U.S.C. SECTION 3507. Applicant: GCI Communication Corp

Call Sign: NONE

File No.: SES-STA-20191017-01345 Special Temporary Authority (STA)

GCI Communication Corp. (GCI) is granted special temporary authorization for 60 days, beginning October 30th, 2019 to operate a 4.5 meter earth station in Huslia, AK with the Galaxy 18 (S2733) satellite at the 123 W.L. orbital location and the ANIK F3 (S2703) satellite at the 118.8 W.L. orbital location in the 3700-4200 MHz (Space-to Earth) and 5925-6425 MHz (Earth-to-space) frequency bands under the following conditions:

- 1. Operations must comply the existing station authorization currently operated by the Federal Aviation Administration under call sign E960362.
- 2. All operations shall be on an unprotected and non-harmful interference basis, GCI, shall not cause harmful interference to, and shall not claim protection from, interference caused to it by any other lawfully operating station and it shall cease transmission(s) immediately upon notice of such interference and must inform the Commission, in writing, immediately of such an event.
- 3. Grant of this STA is without prejudice to any determination that the Commission may make regarding pending or future GCI applications.
- 4. Any action taken or expense incurred as a result of operations pursuant to this STA is solely at GCI's risk.

This action is issued pursuant to Section 0.261 of the Commission's rules on delegated authority, 47 C.F.R. §0.261, and is effective upon release.

APPLICATION FOR RENEWAL OF SPECIAL TEMPORARY AUTHORITY

Pursuant to Section 25.120 of the Federal Communications Commission (the "FCC" or "Commission") rules, 47 C.F.R. §25.120, GCI Communication Corp. ("GCI") requests a renewal of its special temporary authorization ("STA")¹ to continue to operate, for 60 days or less pending a decision on its application for regular authority,² service via two fixed satellite service ("FSS") earth stations in the 3.7-4.2 and 5.925-6.425 GHz bands (the "C-Band").³ Specifically, GCI is seeking a continuation of its temporary authorization to provide service via 4.5 meter Scientific Atlanta 8345 antenna earth stations (the "Station") located at Huslia, AK to communicate with Galaxy 18 and ANIK F3. The Station is an existing station, currently licensed to and owned by the Federal Aviation Administration ("FAA"). The site, which does not have a DBE or callsign associated with it, is currently part of the FAA Alaskan Satellite Telecommunications Infrastructure (ASTI) program, which links the Alaskan Air Route Traffic Control Center in Anchorage, Alaska with 64 FAA facilities throughout the region.⁴ This infrastructure provides Alaska with 90 percent of its inter-facility communications for critical,

¹ See IBFS File No. SES-STA-20190812-01070, granted Aug. 26, 2019 (the "STA").

² See IBFS File No. IB2019003596 (filed Oct. 16, 2019).

³ GCI recognizes that there is a current freeze "on the filing of new or modification applications for FSS earth station licenses, receive-only earth station registrations, and fixed microwave licenses in the 3.7-4.2 GHz frequency band." The freeze on commercial C-band earth station activities does not apply to (a) STA requests for FSS earth station licenses in the C-Band and (b) the operations at issue given their longstanding DBE status. A renewal of the STA will allow GCI to provide ongoing service via the Station solely to the FAA that would not change the status quo in terms of earth station operations in the C-Band. Operations would be limited to FAA services. Out of an abundance of caution, if this STA request is considered a filing prohibited by this freeze, GCI respectfully requests a waiver of the freeze, as a grant of this STA request would "serve the public interest and not undermine the objectives of the freeze." See Temporary Freeze on Applications for New or Modified Fixed Satellite Service Earth Stations and Fixed Microwave Stations in the 3.7-4.2 GHz Band, 90 Day Window to File Applications for Earth Stations Currently Operating in 3.7-4.2 GHz Band, Public Notice, 1, 3, DA 18-398 (rel. Apr. 19, 2018).

⁴ See L3Harris, Alaskan Satellite Telecommunications Infrastructure (ASTI) https://www.harris.com/solution/alaskan-satellite-telecommunications-infrastructure-asti (last visited Oct. 14, 2019).

essential and routine air traffic control services supporting commercial aviation.⁵ This includes communications for commercial airline service in Alaska, commercial international over the pole flights, as well as commercial international flights to the Asia-Pacific. GCI requests a renewal of this STA in order to continue to support these critical U.S. aviation communications in Alaska.

GCI initially requested an STA for a period not to exceed 60 days pursuant to 47 C.F.R. §25.120(3) in order to provide critical services while allowing GCI enough time to complete necessary regulatory processes required by an application for permanent authority. As GCI previously explained, its operation of this Station does not cause harmful interference into surrounding networks, and there are extraordinary circumstances that continue to support the grant of these temporary operations that are in the public interest, and any delay in the institution of these temporary operations would seriously prejudice the public interest. An STA remains necessary for GCI to provide critical telecommunications services in rural Alaska exclusively to the FAA. As documented in Attachment A to the initial STA, the FAA migrated this site from the FAA-owned satellite infrastructure to commercial satellite services provided by L3Harris Technologies and its carrier partners. As documented in Attachment B to the initial STA, L3Harris Technologies chose GCI as its carrier partner to provide C-Band satellite communications services at designated locations in Alaska as part of the FAA's ASTI program. The migration from the FAA infrastructure to GCI has successfully occurred, and the continuity of service at this time is imperative. GCI filed an application for regular authority of the Station during the initial term of the STA,⁶ and now seeks a renewal of the STA during the pendency of that application. Without a grant of this requested temporary authority, GCI will be unable to

⁵ Id.

⁶ See infra n. 2.

continue to support ongoing critical U.S. aviation communications in Alaska. This includes not only domestic flights, but also critical communications for international over the pole (North Pole) flights, as well as international flights to the Asia-Pacific.

GCI's request for a renewal of its STA at this location and for this service continues to qualify as "extraordinary circumstances requiring temporary operations in the public interest," for which "delay in the institution of these temporary operations would seriously prejudice the public interest." A grant of this request would allow GCI to continue to provide critical services to the FAA over this license as it has done during the initial term of the STA. The FAA's ASTI program relies on GCI's services to support critical aviation communications in some of the most rural portions of the country, linking pilots to the world outside of their remote location.

Granting a renewal of the STA to GCI to continue to provide service over the C-Band, for 60 days or less pending a decision on its application for regular authority, would certainly be in the public interest. Continuing to provide critical service to the federal government, and specifically the FAA, is a direct life safety issue for proper aircraft separation and control: for instance, the service provided by GCI at this site enables pilots to communicate with one another and air traffic controllers to prevent collisions, accidents, and to preserve human life. This need for this continued service illustrates a "compelling reason" to grant the requested STA extension.

⁷ 47 C.F.R. §25.120(b)(1).
