

REQUEST FOR SPECIAL TEMPORARY AUTHORITY

By this application, MX1, Inc. respectfully requests special temporary authority (“STA”) for a period of 30 days, starting immediately, on 02/18/2020, to continue the services out of the earth station with call sign # E950056 (File # SES-MOD-20070212-00226). The earth station license expired on 1/27/2020 through inadvertent oversight mainly due to the administrative changes in the organization and an STA is required in order to continue the services offered from the earth station to avoid non-compliance of Commission’s regulations while the license reinstatement application is filed and processed.

The earth station will communicate with Galaxy-28 in the Commission’s Permitted Space Stations list and located at orbital position 89deg W longitude. The carriers in the C-band frequency will be operated within the EIRP limit and observing the emission designations as specified in the license granted for the earth station. Also, the earth station will be operated in compliance with the Commission’s radiation hazard limits as well.

For the foregoing reasons, MX1 Inc. respectfully requests special temporary authority to communicate with Galaxy-28 for a period of 30 days to continue the communication services as described herein. Grant of the requested authority will serve the public interest by offering services to them using the earth station facility.

Respectfully submitted,

On behalf of MX1 Inc.
