Washington, DC 20554

**Re: Request for Special Temporary Authority**  
Hagerstown, Maryland Earth Station E000296

Dear Ms. Dortch:

Intelsat License LLC, as debtor in possession (“Intelsat”), herein requests a grant of Special Temporary Authority (“STA”)<sup>1</sup> for 180 days, commencing upon grant, to use its Hagerstown, Maryland C-band earth station (Call Sign E000296) to provide launch and early orbit phase (“LEOP”) services for the MEV-2 satellite (Call Sign S3059).<sup>2</sup> MEV-2 is expected to launch on July 28, 2020,<sup>3</sup> and the LEOP period is expected to last approximately six months.<sup>4</sup>

The MEV-2 LEOP operations will be performed at the following frequencies: 5924.0 MHz, 5925.2 MHz, 6170.0 MHz, 6180.0 MHz, and 6424.0 MHz in the uplink; and 3701.0 MHz, 3944.5 MHz, 3955.5 MHz, and 4199.8 MHz in the downlink. The LEOP operations will be coordinated with all operators of satellites that use the same frequency bands and are in the LEOP path.<sup>5</sup> All operators of satellites in that path will be provided with an emergency phone number where the licensee can be reached in the event that harmful interference occurs.

The 24x7 contact information for the MEV-2 LEOP mission is as follows:

Ph.: (703) 559-7701 – East Coast Operations Center (primary)  
(310) 525-5591 – West Coast Operations Center (back-up)

Request to speak with Harry Burnham or Kevin Bell.

<sup>1</sup> Intelsat has filed its STA request, FCC Form 159, a \$210.00 filing fee, and this supporting letter electronically via the International Bureau’s Filing System.

<sup>2</sup> See *Satellite Policy Branch Information; Actions Taken*, Report No. SAT-01456, File No. SAT-LOA-20191210-00144 (Mar. 27, 2020) (Public Notice).

<sup>3</sup> The final location for MEV-2 will be 1.0° W.L.

<sup>4</sup> Intelsat will be separately requesting 180 days of STA to support the extended orbit-raising time period required by a satellite using electric orbit raising.

<sup>5</sup> Northrup Grumman Space Systems (“NGSS”), the manager of the MEV-2 mission, will handle the coordination.

Ms. Marlene H. Dortch  
July 3, 2020  
Page 2

In further support of this request, Intelsat herewith attaches Exhibit A, which contains a coordination report. In the extremely unlikely event that harmful interference should occur due to transmissions to or from its earth station, Intelsat will take all reasonable steps to eliminate the interference.

Finally, Intelsat clarifies that during the MEV-2 LEOP mission, NGSS will serve as the mission manager. NGSS will build and send the commands to the Intelsat antenna, which will process and execute the commands. Telemetry received by Intelsat will be forwarded to NGSS. NGSS will perform the ranging sessions by sending a tone to the spacecraft periodically. Intelsat will remain in control of the baseband unit, RF equipment, and antenna.

Grant of this STA request will allow Intelsat to help launch the MEV-2 satellite. The launch of MEV-2 is the first step in ensuring continuity of service at 1.0° W.L. Once on-orbit, MEV-2 will dock with Intelsat 10-02 and, as a combined vehicle stack, the satellites will continue to provide service long past Intelsat 10-02's original lifespan. Grant of this request will thereby promote the public interest.

Please direct any questions regarding this STA request to the undersigned at (703) 559-6949.

Respectfully submitted,

/s/ Cynthia J. Grady
