RE: IBFS File No. SES-STA-20200911-01009, experimental satellite WJ2XUG

Dear Ms. Dortch,

Universal Space Network (USN) herein corrects two statements contained in our Application for Earth Station Special Temporary Authorization.

First, Intelsat is incorrectly identified as operating the satellite. Maxar is operating the satellite.

Second, while the spacecraft did experience an attitude issue, the spacecraft is currently under control. Accordingly, indications in our application about the spacecraft's specific state of attitude were inaccurate.

This additional ground station remains an important part of Maxar's efforts to return the spacecraft to normal operations.

Sincerely,

A handwritten signature in black ink, appearing to read "Joanne Greet", is written over a light gray circular background.

Joanne Greet
