

Applicant: Multi-Link Holland
Call Sign: None
File No: SES-STA-20200915-01019
Special Temporary Authority

Multi-Link Holland is granted extension of Special Temporary Authority for a period of 180 days to continue operating Transmit-Only temporary fixed earth station at 1 Daily's Place, geographic coordinates 30° 19' 19"N, 81° 38' 14.3"W in Jacksonville, FL to communicate with geostationary orbit satellite SES-14 (Call Sign S2974) at orbital location 47.5° W on frequencies 6185 MHz, 6265-6325 MHz, 6365-6425 MHz, and 14000-14500 MHz (Earth-to-space) under the following conditions:

1. Operations shall be within the C-band frequency coordinated parameters for the 3.7meter Andrew antenna.
2. Multi-Link Holland shall not cause harmful interference to, and shall not claim protection from, interference caused to it by any other lawfully operating station and it shall cease transmission(s) immediately upon notice of such interference.
4. In the event that there is a report of interference, Multi-Link Holland must immediately terminate transmissions and notify the FCC in writing.
5. This STA is granted with the condition that the licensee shall comply with 47 C.F.R. §25.277, Temporary fixed earth station operations, regarding submission of Frequency Coordination Reports prior to commencing operations at any location. Failure to perform successful prior frequency coordination will result in the cancellation of your station license herein. Copies of all coordination notices shall be forwarded to the Federal Communications Commission, FCC Monitoring Station, Director of the Columbia Operations Center, 9200 Farmhouse Lane, Columbia, MD 20146.
6. Earth station antenna must not transmit at elevation angle less than three degrees, measured from the horizontal plane to the direction of maximum radiation; however, it may be necessary to specify greater minimum elevation angles to prevent interference pursuant to 47 C.F.R. § 25.205(a).
7. The licensee shall take all necessary measures to ensure that the antenna does not create potential exposure of humans to radiofrequency radiation in excess of the FCC exposure limits defined in 47 CFR 1.1307(b) and 1.1310 wherever such exposures might occur. Measures must be taken to ensure compliance with limits for both occupational/controlled exposure and for general population/uncontrolled exposure, as defined in these rule sections. Compliance can be accomplished in most cases by appropriate restrictions such as fencing. Requirements for restrictions can be determined by predictions based on calculations, modeling or by field measurements. The FCC's OET Bulletin 65 (available on-line at www.fcc.gov/oet/rfsafety)

provides information on predicting exposure levels and on methods for ensuring compliance, including the use of warning and alerting signs and protective equipment for workers.

8. Any action taken, or expense incurred as a result of operations pursuant to this special temporary authority is solely at Multi-Link Holland.

9. Current 24/7 contact name for this event is Marco van Uffelen, phone +31612588224, e-mail address: mvanuffelen@multi-link.tv

10. Operations of this station during the period from expiration of September 26, 2020, FCC IBFS File No. SES-STA-20200827-00929, to the grant of this STA was authorized pursuant to Section 1.62 of the Commission's rules, 47 C.F.R. § 1.62.

This action is issued pursuant to Section 0.261 of the Commission's rules on delegated authority, 47 C.F.R. § 0.261, and is effective immediately.
