

EXPLANATORY STATEMENT

Global Eagle Telecom Licensing Subsidiary, LLC, Debtor-in-Possession (“Global Eagle”), pursuant to Section 25.120(b) of the FCC’s Rules, hereby requests Special Temporary Authority (“STA”) for a period of sixty (60) days, beginning February 26, 2021, to operate its licensed Ku-band network of Earth Stations Aboard Aircraft (“ESAA”) (Call Sign E080100) using space segment capacity on the Eutelsat 139 West A satellite (“E139WA”) at 139.2° W.L. Global Eagle filed an application on January 27, 2021 seeking to modify its license on a permanent basis to specify long-term operation using additional points of communication, including E139WA. The satellite is on the FCC’s Permitted List of non-U.S. satellites granted access to the U.S. market. *See* FCC File No. SAT-PDR-20191017-00115; Call Sign S3055).

Global Eagle’s operations employing capacity on the E139WA satellite will not cause harmful interference to any adjacent satellites operating in accordance with FCC’s two-degree spacing policy. It has included as an annex to its modification application a coordination certification letter from Eutelsat, pursuant to Sections 25.228(a) and 25.220(d) of the Commission’s Rules, covering the proposed operation. The proposed operations will also comply with Global Eagle’s existing, long-term coordination agreements (signed by its affiliate and predecessor licensee, Row 44, Inc.) with the National Science Foundation and the National Aeronautics and Space Administration.

Under Section 25.120(b)(1) of the FCC’s Rules, the International Bureau may grant an STA when the public interest supports the relief requested, and/or delay in the institution of temporary operations would be contrary to the public interest. *See* 47 C.F.R. § 25.120(b)(1). Such authority may be granted for a period not to exceed 60 days where the applicant has filed a request for permanent authority for the parameters and facilities requested. *See* 47 C.F.R. § 25.120(b)(3). This is the case here, where Global Eagle has previously filed an application to modify its license permanently to permit access to E139WA.

Grant of the authority requested here will continue to promote the public interest by permitting Global Eagle to provide continuing and enhanced service to its customers using capacity on the E139WA satellite. This capacity is urgently required to provide sufficient coverage for service for domestic U.S. flight routes connecting cities in the southwestern United States, as well as routes serving the Pacific Ocean region. Grant of the requested STA is consistent with Commission policy and will not adversely affect other authorized operations. Global Eagle acknowledges that any action taken pursuant to a grant of the requested STA will be at its own risk, and respectfully requests that the FCC grant it authority commencing on or about February 26, 2021, for a period of sixty (60) days, to use the E139WA satellite as a point of communication in the Ku-band in the United States using the two types of TECOM antennas now operating under its FCC ESAA network license.
