E202006

Request for Special Temporary Authority

By this application for Special Temporary Authority (“STA”), Moynk Properties, LLC (“Moynk”) seeks authority to add space stations Capella-7 and Capella-8 (Call Sign S3100) as additional points of communication to its fixed earth station located in Kapolei, Hawaii (the “Kapolei Earth Station”; Call Sign E202006).¹

Capella-7 and Capella-8 share radiofrequency characteristics with prior-licensed space stations Capella-3, Capella-4, and Capella-5² which the Commission has previously granted STA for Moynk to add as points of communication.³

The Kapolei Earth Station would communicate with Capella-7 and -8 utilizing the following frequencies:

TT&C Uplink

Center Frequency: 2036 MHz

Emission Designator: 1M40F1D

Polarity: RCHP

TT&C Downlink

Center Frequency: 8027 MHz

Emission Designator: 1M40F1D

Polarity: RHCP

Max EIRP Per Carrier (dBW): 4.5

Max EIRP Density Per Carrier (dBW/4 kHz): -21.0

Payload Downlink

Center Frequency: 8212.5 MHz

Emission Designator: 338MG1D

Polarity: RCHP, LCHP, or RHCP+LHCP

Max EIRP Per Carrier (dBW): 26.0

Max EIRP Density Per Carrier (dBW/4 kHz): -22.0

² *Id.* at 2. See also Grant of Authority, IBFS File No. SAT-LOA-20200914-00108 (Dec. 17, 2020); Grant of Authority, IBFS File No. SAT-LOA-20210119-00012 (May 4, 2021); Grant of Authority, IBFS File No. SAT-MOD-20210512-00067 (June 15, 2021).

³ See Stamp Grant, IBFS File No. SES-STA-20201201-01279 (Jan. 5, 2021); Stamp Grant, IBFS File No. SES-STA-20210325-00571 (May 10, 2021). Moynk is also authorized to communicate with Capella-6. See *id.*

Grant of this STA will serve the public interest by facilitating systematic and efficient use of resources by satellite network operators and service providers, enabling Earth exploration satellite service (“EESS”) customers to focus on satellite and customer operations by minimizing deployment and/or management of their own ground infrastructure and allowing Moynk to provide that service instead. This managed network provides for an increase in coordination and spectral efficiency in the EESS service, as the Kapolei Earth Station can be utilized to maximum efficiency among Moynk’s client constellations. Prompt grant will enable Moynk to provide spectrally efficient ground network solutions that facilitate a growing use of EESS services.

For the reasons set forth above, Moynk respectfully requests that the Commission grant this STA application.
