The proposed TT&C operations will be performed in the following frequencies: 14000.5 MHz and 14499.5 MHz in the uplink; and 12196.0 MHz and 12198.625 MHz in the downlink.

The 24x7 contact information for the Horizons 2 TT&C operations is as follows:

Ph.: (703) 559-7701 – East Coast Operations Center (primary)

All potentially affected operators will be provided with an emergency phone number where the licensee can be reached in the event that harmful interference occurs. In the extremely unlikely event that harmful interference should occur due to transmissions to or from its earth station, Intelsat will take all reasonable steps to eliminate the interference.
