Re: Request for 180-day Grant of Special Temporary Authority
Castle Rock, Colorado Earth Station KL92

Dear Ms. Dortch:

Intelsat License LLC ("Intelsat") herein requests 180 days of Special Temporary Authority ("STA"),¹ commencing October 17, 2022, to use its Castle Rock, Colorado Ku-band earth station, Call Sign KL92, to provide launch and early orbit phase ("LEOP") services for the Hotbird F1 satellite.² Hotbird F1 is expected to launch on October 17, 2022.³ Intelsat expects the LEOP period to last approximately 150 days.⁴

The Hotbird F1 operations will be performed at the following frequencies: 13998.3 MHz, 14000.8 MHz, and 14003.4 MHz in the uplink; and 11701.7 MHz, 11704.6 MHz, 12500.0 MHz, and 12501.7 MHz in the downlink.

The LEOP operations will be coordinated with all operators of satellites that use the same frequency bands and are in the LEOP path.⁵ All operators of satellites in that path will be provided with an emergency phone number where the licensee can be reached in the event that harmful interference occurs. In the extremely unlikely event that harmful interference should occur due to transmissions to or from its earth station, Intelsat will take all reasonable steps to eliminate the interference.

The 24x7 contact information for the Hotbird F1 mission is as follows:

Ph.: (703) 559-7701 – East Coast Operations Center (primary)
(310) 525-5591 – West Coast Operations Center (back-up)

Request to speak with Kevin Bell or Glen Jones.

¹ Intelsat has filed its STA request, FCC Form 159, a \$210.00 filing fee, and this supporting letter electronically via the International Bureau's Filing System.

² In support of this request, additional antenna and satellite information is provided in Exhibit A, and a waiver request is attached as Exhibit B.

³ Intelsat understands that Hotbird F1 is licensed by France.

⁴ Intelsat is requesting 180 days of STA to accommodate potential delays.

⁵ Airbus, the manager of the Hotbird F1 mission, will handle the coordination.

Ms. Marlene H. Dortch

Finally, Intelsat clarifies that during the Hotbird F1 LEOP mission, Airbus will serve as the mission manager. Airbus will build and send the commands to the Intelsat antenna, which will process and execute the commands. Telemetry received by Intelsat will be forwarded to Airbus. Intelsat will perform the ranging sessions by sending a tone to the spacecraft periodically. Intelsat will remain in control of the baseband unit, RF equipment, and antenna.

Grant of this STA request will allow Intelsat to help launch the Hotbird F1 satellite. This will help provide services at the 13.0° E.L. location and thereby promotes the public interest.

Please direct any questions regarding this STA request to the undersigned at (703) 559-7799.

Respectfully submitted,

/s/ W. Ray Rutngamlug

EXHIBIT A

Antenna

Antenna size (m)	12.5
Transmit Frequencies (MHz)	13998.3, 14000.8, and 14003.4
Receive Frequencies (MHz)	11701.7, 11704.6, 12500.0, and 12501.7
Emission Designator	1M00F2D
Polarization	Circular
Bandwidth	1 MHz
Transmit Gain	63.7 dBi @ 13.750 GHz
Maximum EIRP per Carrier	85 dBW
Maximum EIRP Density per Carrier	61.02 dBW/4 kHz
Site Location	Castle Rock, CO
Latitude (NAD83)	39° 16' 35.215" N
Longitude (NAD83)	104° 48' 22.867" W

Point(s) of Communication

Satellite	Hotbird F1
Call Sign	none
Satellite Type	Geostationary
Orbital Location	13.0° E.L.
