Re: Request for Further 180-day Extension of Special Temporary Authority
7.3m S-band Antenna; Haleiwa, Hawaii

Dear Ms. Dortch:

Intelsat License LLC ("Intelsat") herein requests an additional 180 days of Special Temporary Authority ("STA")¹ previously granted to Intelsat to utilize a 7.3m S-band antenna located at its Haleiwa, Hawaii teleport to provide telemetry, tracking, and command ("TT&C") restoration services ("TT&C Restoration Services") for the EUTELSAT-139W (S3055) satellite at 139.2° W.L.² The TT&C Restoration Services include bi-annual testing, which lasts approximately two hours per test, and TT&C services in the event the satellite's primary TT&C experiences an anomaly.

The TT&C Restoration Services will continue to be performed at the following frequencies: 2086.03 MHz in the uplink and 2265.38 MHz in the downlink.

In the extremely unlikely event that harmful interference should occur due to transmissions to or from its earth station, Intelsat will take all reasonable steps to eliminate the interference.

The 24x7 contact information for the TT&C Restoration Services is as follows:

Ph.: (703) 559-7701 – East Coast Operations Center (primary)
(310) 525-5591 – West Coast Operations Center (back-up)
Request to speak with Glen Jones or Mike Ryan.

In support of this request, Intelsat incorporates by reference Exhibit A of its original request,³ which contains technical information that demonstrates that the operation of the earth station is compatible with its electromagnetic environment and will not cause harmful interference into any lawfully operating commercial terrestrial facility.

¹ Intelsat has filed its STA request, an FCC Form 159, the filing fee, and this supporting letter electronically via the International Bureau's Filing System.

² See, e.g., *Satellite Communications Services Information; Actions Taken*, Report No. SES-02510, File No. SES-STA-20220824-00918 (Oct. 19, 2022) (Public Notice).

³ See *Satellite Communications Services Information; Actions Taken*, Report No. SES-02448, File No. SES-STA-20210215-00344 (Mar. 9, 2022) (Public Notice).

Ms. Marlene H. Dortch

Additionally, Intelsat requests continued waiver of the U.S. Table of Frequency Allocations ("Table of Allocations") for the use of 2025-2100 MHz and 2200-2290 MHz for the reasons previously set forth.⁴

Grant of this further STA extension request will allow Intelsat to continue to provide TT&C Restoration Services to the EUTELSAT-139W spacecraft, which will in turn ensure safe station-keeping of the satellite and thereby promotes the public interest.

Please direct any questions regarding this further STA extension request to the undersigned at (703) 559-6949.

Sincerely,

/s/ Cynthia J. Grady
