Re: Request for Further Extension of Special Temporary Authority to Operate Ku-band Flat Panel Antenna

Dear Ms. Dortch:

Intelsat License LLC ("Intelsat") herein requests an additional 30 days of Special Temporary Authority ("STA")¹ previously granted to Intelsat to operate a Ball 6x4 0.41m Ku-band flat-panel antenna for drive tests in McLean, Virginia; Mt. Prospect, Illinois; and from McLean, Virginia to Florida.² Intelsat expects drive tests to continue through May 2023.

Pursuant to grant, operations will continue in the following frequency bands: 11700-12200 MHz (downlink) and 14000-14500 MHz (uplink) with the Galaxy 11, Galaxy 18, SKY-B1, and Intelsat 37e satellites.³ In support of this request, Intelsat incorporates by reference additional operational information, the map of the Virginia-Florida route, and the Radiation Hazard Report included with its original request.⁴

The 24x7 contact information for the continued operations is: Tony Williams at (404) 381-2744.

In the extremely unlikely event that harmful interference should occur due to transmissions to or from its antenna, Intelsat will take all reasonable steps to eliminate the interference.

¹ Intelsat has filed its STA request, FCC Form 159, a \$220.00 filing fee, and this supporting letter electronically via the International Bureau's Filing System.

² See, e.g., *Satellite Communications Services Information; Actions Taken*, Report No. SES-02556, File No. SES-STA-20230322-00390 (Apr. 5, 2023) (Public Notice).

³ Intelsat is not operating in the 14000-14500 MHz band within 125km of the Federal sites specified in 47 C.F.R. § 25.228(j)(1). Additionally, none of Intelsat's operations are within line-of-sight of active Federal sites identified in footnote US113 of the U.S. Table of Frequency Allocations. See 47 C.F.R. § 2.106.

⁴ See *Satellite Communications Services Information; Actions Taken*, Report No. SES-02546, File No. SES-STA-20230203-00142 (Mar. 1, 2023) (Public Notice).

Ms. Marlene H. Dortch

Continuation of the requested operations will enable Intelsat to test new equipment. Accordingly, grant of this further STA extension is in the public interest.

Respectfully submitted,

/s/ Cynthia J. Grady
