Re: Request for Further Extension of Special Temporary Authority
Castle Rock, Colorado Earth Station KL92

Dear Ms. Dortch:

Intelsat License LLC (“Intelsat”) herein requests an additional 30 days of Special Temporary Authority (“STA”)¹ previously granted Intelsat to use its Castle Rock, Colorado Ku-band earth station (Call Sign KL92) to continue providing telemetry, tracking, and command (“TT&C”) services² for Intelsat 5 (Call Sign S2704) on-station at 137.0° W.L.³

TT&C operations will continue to be performed in the following frequencies: 14498 MHz (H) and 13999 MHz (RHCP) in the uplink; and 11451 MHz (H, V, and RHCP), 11452 MHz (H, V, and RHCP), and 11454 MHz (RHCP, and LHCP) in the downlink. On-station at 137.0° W.L., Intelsat will continue operate in conformance with FCC rules and any relevant coordination agreements. In further support of this further extension request, Intelsat incorporates by reference Exhibits A and B

¹ Intelsat has filed its STA request, an FCC Form 159, a \$210.00 filing fee, and this supporting letter electronically via the International Bureau’s Filing System (“IBFS”). This extension request is timely filed per the Federal Communications Commission’s Public Notice. *Impact of Potential Lapse in Funding on Commission Operations*, DA 19-10, p. 4 (Jan. 2, 2019) (Public Notice).

² See, e.g. *Satellite Communications Services Information; Actions Taken*, Report No. SES-02128, File No. SES-STA-20181217-03494 (Dec. 26, 2018) (Public Notice).

³ The original STA provided authority for the drift and on-station operations. Intelsat 5 arrived at 137.0° W.L. on May 30, 2018. Intelsat is also utilizing the following antennas on station for Intelsat 5: E060384, E140121, and KA258.

submitted with its original STA request,⁴ which contain technical information that demonstrates that the operation of the earth station will be compatible with its electromagnetic environment and will not cause harmful interference into any lawfully operating terrestrial facility, or into Federal systems operating in the 13.75-14.00 GHz band. In the extremely unlikely event that harmful interference should occur due to transmissions to or from its earth station, Intelsat will take all reasonable steps to eliminate the interference.

Grant of this STA further extension request will allow Intelsat to continue safely station-keep Intelsat 5 at its new location. This, in turn, will help meet a new service demand at the 137.0° W.L. orbital location and thereby promotes the public interest.

Please direct any questions regarding this STA further extension request to the undersigned at (703) 559-6949.

Respectfully submitted,

/s/ Cynthia J. Grady

⁴ See *Satellite Communications Services Information; Actions Taken*, Report No. SES-02062, File No. SES-STA-20180504-00488 (May 16, 2018) (Public Notice). The license for KL92 covers multiple antennas. This STA further extension request seeks authority for two of those antennas: K01 and K16.
