

### Public Interest Statement

Pursuant to Section 25.120 of the Commission's Rules, Telesat Network Services, Inc. ("Telesat") requests an extension for up to thirty (30) days, beginning on October 27, 2021, of its Special Temporary Authority ("STA") to add the Anik F1 satellite at 109.2° WL as a point of communication for its earth station located in Mt. Jackson Virginia, call sign E060351.

Telesat was granted an initial 30-day STA, beginning March 1, 2021,<sup>1</sup> pending action on a petition for declaratory ruling ("PDR") to add Anik F1 to the Permitted List at 109.2° WL.<sup>2</sup> Telesat requested seven 30-day extensions<sup>3</sup> and now seeks an additional 30 days because the PDR remains pending.<sup>4</sup>

Telesat seeks this STA extension so the Mt. Jackson earth station may continue to serve as a back-up location for Anik F1's telemetry, tracking and command ("TT&C") while the PDR is pending. The TT&C carriers will operate in accordance with the already-licensed parameters for the Mt. Jackson earth station; the only change will be to add Anik F1 at 109.2° WL as a point of communication. Once the PDR has been granted, back-up TT&C authority will be covered by the Permitted List authority for the Mt. Jackson earth station.

As with its initial request, there is good cause for granting Telesat's extension request. Providing back-up TT&C authority for Anik F1 will ensure that the satellite can be maintained in a safe and stable orbit, thereby protecting Anik F1 and other satellites and making Anik F1 available to provide new capacity to support aero and maritime services in the United States, the Caribbean, and Central America.

Accordingly, and for good cause shown, Telesat asks that its STA extension request be granted.
