**Re: Request for Extension of Special Temporary Authority
Hagerstown, Maryland Earth Station KA258**

Dear Ms. Dortch:

Intelsat License LLC, as debtor in possession (“Intelsat”), herein requests an additional 30 days of Special Temporary Authority (“STA”)¹ previously granted to Intelsat² to use its Hagerstown, Maryland Ku-band earth station, call sign KA258, to provide launch and early orbit phase (“LEOP”) services for the SES-17 satellite (S3043).³ SES-17 was launched on October 24, 2021, and the LEOP period is expected to last an additional four months.

The SES-17 LEOP operations will continue to be performed at the following frequencies: 14003.0 MHz (RHCP), 14007.0 MHz (L/RHCP), and 14497.0 MHz (L/RHCP) in the uplink and 11704.5 MHz (RHCP) and 12195.5 MHz (RHCP) in the downlink.⁴ The LEOP operations will continue to be coordinated with all operators of satellites that use the same frequency bands and are in the LEOP path.⁵ All operators of satellites in that path have been provided with an emergency phone number where the licensee can be reached in the event that harmful interference occurs.

The 24x7 contact information for the SES-17 LEOP mission is as follows:

Ph.: (703) 559-7701 – East Coast Operations Center (primary)
(310) 525-5591 – West Coast Operations Center (back-up)

¹ Intelsat has filed its STA request, FCC Form 159, a \$210.00 filing fee, and this supporting letter electronically via the International Bureau’s Filing System.

² See *Satellite Communications Services Information; Actions Taken*, Report No. SES-02412, File No. SES-STA-20210901-01589 (Oct. 27, 2021) (Public Notice).

³ See *Satellite Policy Branch Information; Actions Taken*, Report No. SAT-01485, File No. SAT-MPL-20200609-00070 (July 31, 2020) (Public Notice).

⁴ Intelsat originally requested 13750-14500 MHz in the uplink and 11700-12450 MHz in the downlink.

⁵ Thales Alenia Space (“Thales”), the manager of the SES-17 mission, will handle the coordination.

Ms. Marlene H. Dortch

Page 2

Request to speak with Harry Burnham or Kevin Bell.

In the extremely unlikely event that harmful interference should occur due to transmissions to or from its earth station, Intelsat will take all reasonable steps to eliminate the interference. Finally, Intelsat clarifies that during the SES-17 LEOP mission, Thales will serve as the mission manager. Thales will build and send the commands to the Intelsat antenna, which will process and execute the commands. Telemetry received by Intelsat will be forwarded to Thales. Intelsat will perform the ranging sessions by sending a tone to the spacecraft periodically. Intelsat will remain in control of the baseband unit, RF equipment, and antenna.

Grant of this STA extension request will allow Intelsat to help launch the SES-17 satellite, which in turn will help provide of service from the 67.1° W.L. orbital location. Grant of this request will thereby promote the public interest.

Please direct any questions regarding this STA extension request to the undersigned at (703) 559-6949.

Respectfully submitted,

/s/ Cynthia J. Grady
