U.S. C- and Ku-band space and earth station authorizations and other ancillary licenses and authorizations. Intelsat's five Commission-licensed subsidiaries are: Intelsat LLC, which holds Title III radio licenses; Intelsat North America LLC, which holds Title III radio licenses; Intelsat USA License Corp., which holds Title II common carrier authorizations; Intelsat General Corporation, which holds a Title II common carrier authorization; and Intelsat MTC LLC, which holds Title III radio licenses (together, the "Intelsat Licensees").

Intelsat owns and operates a global satellite system primarily serving the voice, data, and Internet service requirements of telecommunications and government customers. Intelsat's fleet of satellites offers service in more than 200 countries. Intelsat also provides lifeline connectivity services to less developed areas of the world.<sup>7</sup>

### III. THE TRANSACTION

On August 28, 2005, Intelsat's indirect subsidiary Intelsat (Bermuda), Ltd. and Intelsat (Bermuda), Ltd.'s wholly-owned subsidiary Proton Acquisition Corporation ("Merger Sub") entered into a merger agreement with PanAmSat. The merger agreement contemplates that Merger Sub will be merged with and into PanAmSat, with PanAmSat remaining as the surviving entity. Upon completion of the transaction, PanAmSat would be a direct wholly-owned subsidiary of Intelsat (Bermuda), Ltd. and an indirect wholly-owned subsidiary of Intelsat. Post merger, PanAmSat and its subsidiaries would continue as separate corporate entities.

The terms of the merger agreement provide that each outstanding share of common stock of PanAmSat will be converted into the right to receive \$25.00 in cash, without interest, plus a pro rata portion of any of PanAmSat's regular quarterly dividend that has not been declared (or has been declared with a record date after the closing) with respect to the fiscal quarter in which the merger occurs (but not for the period after the closing of the merger). Consummation of the merger is subject to conditions, including receipt of requisite regulatory approvals, receipt of financing by Intelsat, and adoption of the merger agreement by PanAmSat's stockholders.

Prior to the closing of the transaction, Intelsat (Bermuda), Ltd. is expected to transfer substantially all of its assets and liabilities to Intelsat Intermediate Holding Company, Ltd., a newly-formed wholly-owned subsidiary formed under the laws of Bermuda. This new Bermuda subsidiary then would become the direct parent of Intelsat Subsidiary Holding Company, Ltd. and its subsidiaries, including the five Intelsat Licensees.<sup>8</sup>

Intelsat also provides common carrier service on routes not served by submarine cables. See *Intelsat-Zeus Order*, 19 FCC Rcd at 24835, ¶ 36 (the subsidiaries of Intelsat that hold international section 214 authorizations are treated as "dominant" in their provision of Intelsat space segment capacity for switched voice and private line services on non-competitive, or "thin," U.S. international routes not served by submarine cables); *Intelsat MTC LLC*, File No. ITC-MOD-20050329-00169, Informative Public Notice, Report No. TEL-00946, DA No. 05-2446 (Int'l Bur. Sept. 15, 2005), at 4 (Intelsat MTC LLC, one of Intelsat's three subsidiaries that held international section 214 authorizations, surrendered its authorizations).

<sup>8</sup> The Applicants advise that the Intelsat Licensees will be filing a separate application requesting Commission approval for the insertion of this new Bermuda-based entity within the chain of ownership of the Intelsat Licensees.
