

EXHIBIT F

PUBLIC INTEREST STATEMENT

Pursuant to a Stock Purchase Agreement entered into as of August 10, 2010, by and between FCFI Acquisition LLC (“FCFI”) and American International Group, Inc. (“AIG”), FCFI proposes to acquire control of American General Finance, Inc. (“AGFI”), licensee of Earth Station E950321. AGFI currently is an indirect wholly-owned subsidiary of AIG; AIG is controlled by the AIG Credit Facility Trust – a trust established solely for the benefit of the United States Treasury.¹ Upon consummation of the proposed transaction, FCFI, which is directly or indirectly owned by certain investment funds ultimately controlled by Fortress Investment Group LLC (“Fortress”), would acquire an economic interest of 80% (representing between 80% and 84.2% of the voting rights) in AGFI. AIG would retain a 20% economic interest (representing between 15.8% and 20% of the voting rights) in the licensee. A detailed explanation of the ownership and control of the licensee pursuant to the proposed transaction is set forth in Exhibit E.

AGFI is a consumer finance company that provides a wide range of consumer lending and insurance products throughout the United States, Puerto Rico, the Virgin Islands, and the United Kingdom through its subsidiaries. AGFI offers secured and unsecured personal consumer loans, first and second mortgages, retail sales financing, bill consolidation loans, home equity loans and lines of credit, home improvement loans, and credit insurance. AGFI conducts its business through more than 60 subsidiaries licensed in 50 jurisdictions. In 2009, AGFI made approximately \$3.1 billion in loans.

The Earth station license held by AGFI authorizes operation of a VSAT network that is vital to the operation of AGFI’s consumer finance business. AGFI uses these facilities solely for internal communications purposes, including to manage, distribute and collect information among its headquarters and its branch offices and to facilitate the administration of lending, financing and other credit transactions with its customers.

The transaction will generate substantial public interest benefits for the customers and communities in which AGFI operates. These benefits include:

¹ In September 2008, in light of the broad U.S. Government initiative to aid the economic recovery and to prevent further distress in financial markets, the Board of Governors of the U.S. Federal Reserve System, with the support of the U.S. Treasury Department, authorized the Federal Reserve Bank of New York (“FRBNY”) to lend AIG up to \$85,000,000,000. AIG and the FRBNY subsequently entered into a Credit Agreement that, among other things, required AIG to issue to the AIG Credit Facility Trust convertible preferred stock. The AIG Credit Facility Trust currently owns 100% of the Series C Perpetual, Convertible, Participating Preferred Stock of AIG (the “Series C Preferred Stock”), which has voting and dividend rights equal to approximately 79.8% of the issued and outstanding shares of the common stock of AIG that would be outstanding after conversion of the Series C Preferred Stock in full. The Commission granted consent for the AIG Credit Facility Trust to acquire control over AIG (and therefore AGFI) on April 13, 2009 (see File No. File No. SES-T/C-20090219-00195). As a result, AIG considers the AIG Credit Facility Trust to hold ultimate control over AGFI.

- For customers, the transaction would preserve AGFI as a leading provider of consumer financing solutions in otherwise underserved markets.
- For AIG, the transaction would serve as an important step in its ongoing restructuring process. The transaction would allow AIG to continue to monetize its non-core assets and pay back U.S. taxpayers.
- For AGFI, the elimination of uncertainty regarding its continued consolidation with AIG will allow AGFI to better serve the financing needs of consumers nationwide.

Accordingly, grant of this application would serve the public interest.

Fortress is a leading global investment manager headquartered in New York City. Fortress has approximately 880 employees and is publicly traded on the New York Stock Exchange under the ticker symbol "FIG." As of June 30, 2010, Fortress had approximately \$41.7 billion of assets under management.
