

Exhibit A

Description of Application; Frequency Bands; Use of Non-U.S. Licensed Satellites

By this Application, SkyBitz, Inc. (“SkyBitz”) and Telular Corporation (“Telular”) request Commission approval for the transfer of control of SkyBitz to Telular. SkyBitz holds blanket mobile earth station license E000725, which was most recently modified in File No. SES-MFS-20081107-01453. This license gives SkyBitz authority to operate up to 450,000 mobile earth terminals operating in portions of the L-band (specifically, 1626.5-1660.5 MHz, 1574.42-1576.42 MHz, and 1525.0-1559.0 MHz) on MSAT-1, MSAT-2, MSV-1 (now called SkyTerra 1), and the ISAT satellites.

This Application seeks authority only to transfer control of SkyBitz to Telular. No changes are contemplated at this time to SkyBitz’s license, equipment, or operations. As such, the parties incorporate by reference all previously filed technical information, including but not limited to SkyBitz’s responses to 47 CFR 25.137 (use of non-U.S. licensed satellites) and radiation hazard studies.
