

**Public Interest Statement (Response to Question A21)**

The proposed transfer of control of BFI Licenses, LLC (“BFI”) and the fixed and temporary-fixed Earth station licenses it holds from BFI Investors, LLC to CSC Encompass Holdings, LLC, a Delaware limited liability company (“CSC Holdings”) will serve the public interest, convenience and necessity by maintaining the subject communications facilities in the hands of BFI and its parent company Encompass Digital Media, Inc. (“Encompass”), which has built a significant business providing digital transmission services to a variety of media companies. BFI and Encompass intend to continue using and developing these facilities to expand their existing network origination, transmission and production services business, increase their ability to offer sophisticated digital transmission services directly to customers across the country, and generally to enhance the scope and efficiency of their overall business. The addition of CSC Holdings as the new controlling investor, with its strong track record in the telecommunications and technology sector, will help to promote these goals and the substantial public interest benefits arising from these activities, including enhanced competition and customer choice. Following consummation, the current management of Encompass will continue to operate the company and to provide high quality communications services using the licensed facilities.
