

EXHIBIT F
FCC Form 312
Schedule A, Question A21

This application serves as notification of the *pro forma* assignment of the earth station license held by WDTN Broadcasting, LLC, which will occur as a result of the conversion by merger (the “LLC Conversion”) of LIN Television Corporation’s direct corporate parent, LIN TV Corp. (“LIN Corp.”), from a corporation to a limited liability company, LIN Media LLC (“LIN LLC,” and, together with LIN Corp., the “Company”). The LLC Conversion is intended solely to change the Company’s form of organization from a corporation to a limited liability company. LIN LLC will have the same classes of authorized capital and the same amount of outstanding equity interests as LIN Corp. and there will be no change in the proportionate ownership interests in LIN LLC after the transaction as in LIN Corp. prior to the transaction. The LLC Conversion will result in no change in the business, management, operations or assets of the Company.

In connection with the LLC Conversion, the Company also intends to convert the form of organization of certain of LIN Television’s direct or indirect wholly owned subsidiaries from corporations to limited liability companies. One of these subsidiaries, TVL Broadcasting, Inc. (“TVL Parent”), is the intermediate parent of two of LIN Television’s indirect FCC licensee subsidiaries, TVL Broadcasting of Rhode Island, LLC (“TVL Rhode Island”), and WDTN Broadcasting, LLC (“WDTN”). Consequently, the conversion of TVL Parent to an LLC will result in a transfer of control of TVL Rhode Island and WDTN eligible for *pro forma* treatment. The applicants respectfully request Commission consent to the intermediate transfer of control of WDTN pursuant to the instant application.

Concurrently herewith, FCC Form 312s have been filed with the International Bureau, FCC Form 316s have been filed with the Media Bureau and FCC Form 603s have been filed with the Wireless Bureau for consent to the transfer of control of the Company's satellite earth, television and, private radio stations, respectively.

The associated earth station license will continue to be used in the same manner and for the same purposes following the pro forma transactions. Accordingly, the public interest would be served by FCC grant of the instant application.
