

Attachment 1
Licensees and Licenses Subject to the Instant Application

The instant application involves a *pro forma* transfer of control from Hearst Holdings, Inc. (“Holdings” or “Transferor”) to Hearst Communications, Inc. (“Communications” or “Transferee”) in connection with an internal corporate reorganization. Holdings and Communications are each, ultimately, controlled by The Hearst Corporation.

Holdings currently owns all of the issued and outstanding equity interests in Hearst Broadcasting, Inc. (“HBI”), which is a parent company of the licensees subject to this application (which is one of a series of applications) as set forth below. The instant application proposes the transfer of all of the equity interests in HBI from Holdings to Communications. Holdings owns 92.55 percent of the voting interests (and 94.56 percent of the equity interests) in Communications. CDS Global, Inc. (“CDS”), also a wholly owned subsidiary of Holdings, owns the remaining interests in Communications. Immediately below is a summary graphical depiction of the proposed *pro forma* transfer of control:¹

¹ Attached hereto are “before” and “after” graphical depictions of The Hearst Corporation’s complete FCC licensee corporate structure.

This is a *pro forma* transaction because the transaction is a “corporate reorganization which involves no substantial change in the beneficial ownership” of the licensee companies. *See, e.g.,* 47 C.F.R. § 73.3540(f)(4) (governing Media Bureau licenses, which are a principal component of the instant transaction). The practical effect is to insert an existing subsidiary of The Hearst Corporation, Communications, into the chain of ownership below Holdings and above HBI and the licensee entities. All of the officers and directors of Communications are officers and directors of Holdings.

Since this application is in connection with an internal corporate restructuring, there is no formal written agreement between Holdings and Communications.

The instant application (and the related applications) covers the FCC International Bureau licenses held through various subsidiary entities by Transferor and, for convenience, this exhibit references all other FCC International Bureau licensee companies owned directly or indirectly by the Transferor. The licensee and call letters subject to the instant application are highlighted in yellow.

Below is a series of tables describing the authorization(s) subject to the transaction and this application, including call sign, class of station, type of earth station facility, and subsidiary licensee name.

HBI is ultimately controlled by The Hearst Corporation (“Hearst”). Hearst owns 100 percent of the Transferor; the Transferor owns 100 percent of HBI; and HBI owns 100 percent of Hearst Television Inc. (“HTV”). HTV owns 100 percent of each licensee of the following earth stations:
