

EXHIBIT E

Description of Pro Forma Transaction

The applicants seek prior Federal Communications Commission (“FCC”) consent to the proposed *pro forma* transfer of control of satellite earth station licensee USSecurenet, LLC “Licensee”). FCC prior approval for this *pro forma* transfer of control application is requested so that the transactions can be consummated by June 1, 2015.

The current ownership of Licensee is 0.1 percent by U.S. citizen Deborah Deffaa and 99.9 percent by Debcom Inc., a U.S. corporation that is owned 100 percent by Deborah Deffaa.

Applicants propose to transfer control of Licensee to an affiliate, MVS USA, Inc., which is a U.S.-corporation currently owned 100 percent by Debcom but upon consummation will be directly owned 100 percent by Deborah Deffaa. Because Deborah Deffaa will have ultimate control of Licensee before and after the proposed transaction, it is properly deemed a *pro forma* transfer of control. Organizational charts depicting the current and proposed ownership structures are attached.

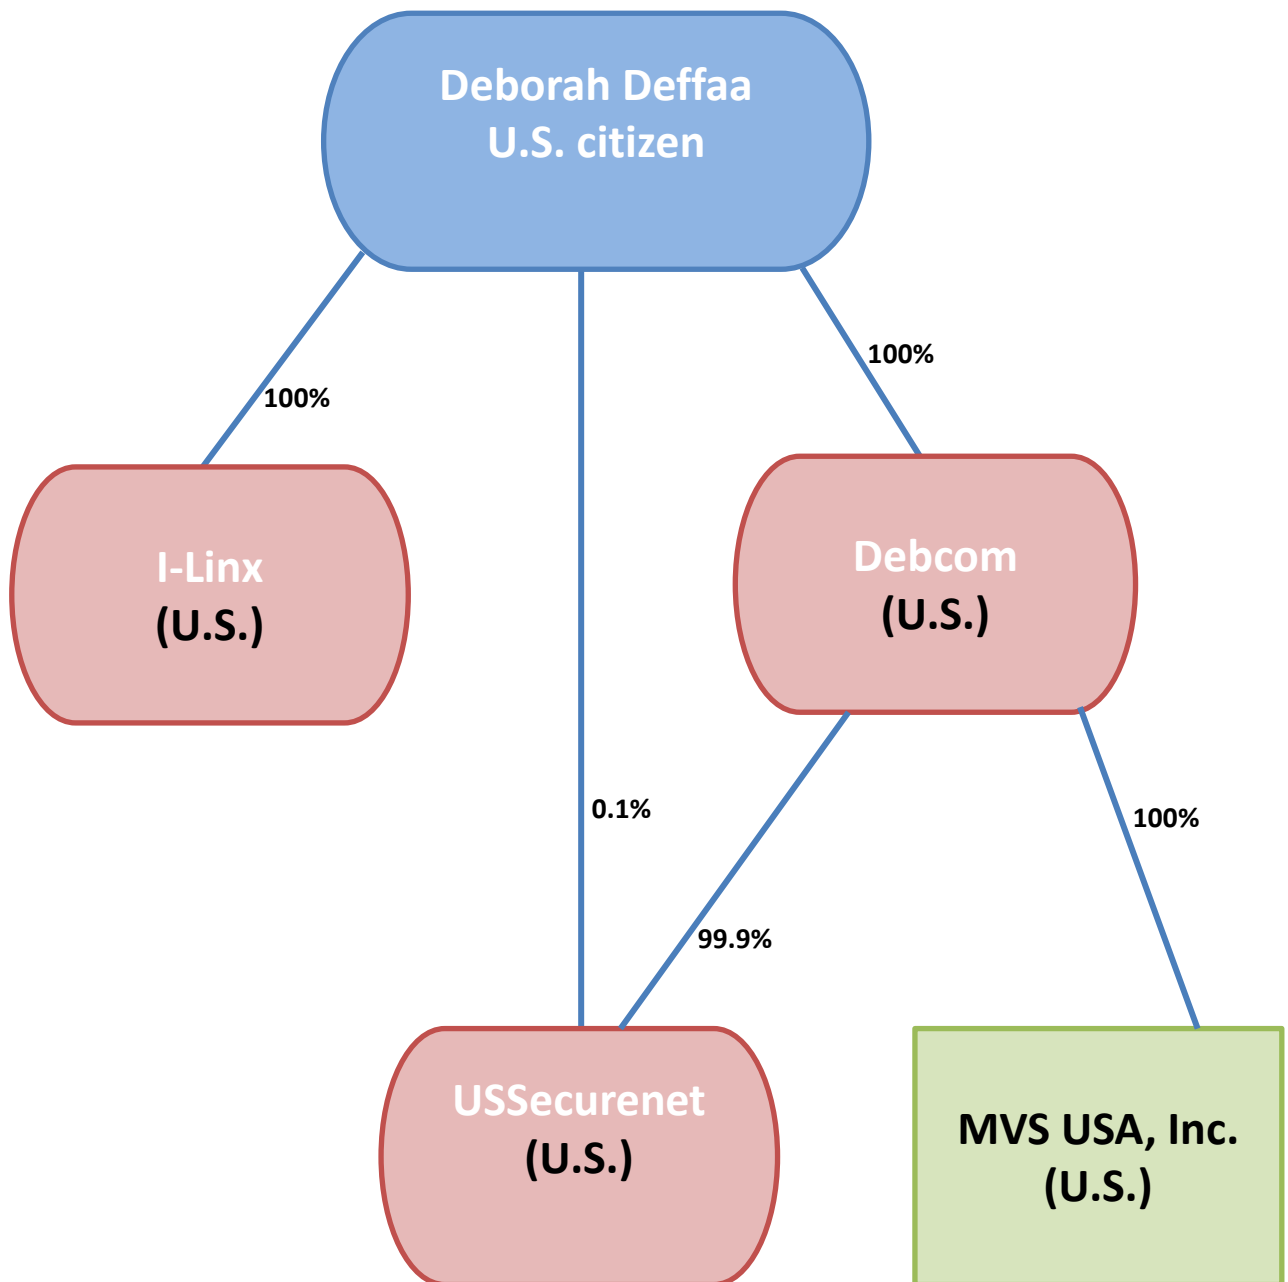

The address, citizenship, and primary business for the proposed interest holders in USS identified above are as follows:

Name: Deborah Deffaa
Citizenship: U.S.
Address: 1086 Goffle Road, Suite 101, Hawthorne, NJ 07506
Primary Business: Business owner

Name: MVS USA, Inc.
Citizenship: U.S.
Address: 1086 Goffle Road, Hawthorne, NJ 07506
Primary Business: Operator of earth station network

Upon consummation of the proposed internal reorganization, no other person or entity directly or indirectly will hold a ten percent or greater ownership interest in the Licensee.
