**OWNERSHIP AND CONTROL OF  
ASTRIUM SERVICES BUSINESS COMMUNICATIONS INC.**

This application seeks the consent of the Federal Communications Commission (“FCC”) for the *pro forma* transfer of control of Astrium Services Business Communications Inc. (“Licensee”) that occurred during a recent internal corporate restructuring. Specifically, the Licensee’s immediate parent company is Astrium Services AS (“Astrium AS”). Astrium AS’s immediate parent company, Mobsat Group Holding S.à.r.l., was liquidated as of November 10, 2015. The Licensee before and after the transactions continued to be indirectly controlled by Airbus Group SE (“Airbus”).<sup>1</sup> A simplified ownership chart is attached as Exhibit A.

Because this request is being filed after the transaction’s consummation date, the parties respectfully request a waiver of the requirement contained in Section 25.119(d) of the FCC’s rules. The Licensee takes its FCC compliance obligations seriously, and the delay in filing this request with the FCC is purely the result of an administrative oversight.

The transaction did not change the Licensee’s foreign ownership as previously approved by the FCC. The Licensee’s immediate parent company is Astrium AS, a wholly owned subsidiary of Airbus DS Holding SAS. Airbus DS Holding SAS is a wholly owned subsidiary of Airbus DS Holdings BV, which is a wholly owned subsidiary of Airbus. Thus, the transaction only involved a non-substantial change in the Licensee’s ownership structure, and the FCC is not required to revisit the Licensee’s foreign ownership.

Grant of the application is in the public interest because it will facilitate user access to continued and uninterrupted satellite communications services.
