RE: INTERNATIONAL SIGNALLING POINT CODE FILING  
Seattle, WA SMLC 1

Dear Ms. Hsu,

Within the assignment guidelines, and consistent with ITU\_T Recommendation Q.708, TeleCommunication Systems, Inc. (TCS) requests the assignment of one (1) International Signaling Point Code.

The International Signaling Point Code (ISPC) will be used by TCS to deploy a new Signaling Control Point (SCP) within our signaling network to serve international customers. As required, there is no direct relationship of these codes to telephone, data or ISDN numbering and they will be used for international signaling points within the TCS Signaling System 7 (SS7) ITU Network.

The above requested ISPC will be deployed at our facility in Seattle, WA and will be dedicated to host one of two (1 of 2) in a SLMC platform. We respectfully request that this new point code to be assigned by January 10, 2010. If you require any additional information regarding this request, please do not hesitate to contact me.

Regards,

A handwritten signature in black ink, appearing to read 'Chris Kraft', with a long horizontal flourish extending to the right.
