Re: E980224 License Surrender

Dear Commission,

I was working recently with Stephen French in the Financial Operations Division and he informed us that what we thought was a retired Satellite uplink license, call sign E980224, has not officially been surrendered.

We purchased the license from ACME Communications in April 2013. We proceeded to retire the outdated satellite uplink. The signal has been offline for well over a year.

Please accept this notification as an official surrender of license E980224.

Thank you for your assistance.

Respectfully,

Marc Jaromin
